Catalog No. 48
Spring 1924

Arkansas Seed and Nursery Co.
The Mail Order House
Fayetteville, Ark.
45—ARKANSAS BEAUTY PEACH

One of the Surest to Bear and of Finest Texture and Flavor.

This superb peach will show its worth in either the Home or Commercial Orchard.

Ripens ten days later than Crawford Early, free stone, white with red blush, splendid bearer, small seed, good size. A very valuable peach and one you should include in your order.

JAPAN DREAM PEACH

World’s Earliest Bearing Peach

Produces perfect, well-flavored fruit the next year after planting. This peach was introduced from Japan as the Japan Blood Dwarf. After ten years of breeding up, by constant budding from the best types, we have produced a peach of firmness, flavor and beauty. These good qualities, combined with its wonderful record for young bearing, make this peach, which we have named “Japan Dream,” the wonder of all who grow it.

128A—St. Regis Everbearing Red Raspberry

ST. REGIS RASPBERRY Bears First, Last and All the Time. RASPBERRIES for four months, that’s what you get when you plant St. Regis, the new everbearing variety. They are raspberries of the Highest Grade. The variety has been aptly termed the “early ’til late” variety; for it is the first red raspberry to give ripe fruit, while it continues to produce berries without intermission until late in October.

Strong, Well-Rooted Plants. Price
3 for 25c, 12 for 75c, 100 for $6.00

66—PROGRESSIVE EVERBEARING STRAWBERRIES

Plant Progressive Everbearing Strawberries and step into your patch any time from June until frost and gather the luscious berries. That’s just what you can do. A sure bearer of beautiful, delicious berries best for either the home garden or market, and the only variety that will produce a crop the first year. Our plants are mountain grown, hardy, with very heavy root systems.

Price 25 for $1.00, 50 for $1.50, 100 for $2.50, 1,000 for $20.00.

Plant early—Order Now.
No matter how small the home, one can usually find space for from four to six grape vines, which will bear an abundance of luscious fruit which can not be surpassed. They can be trained over the garden fence, over the veranda, not only furnishing fruit, but making a vine that is beautiful and at the same time furnishing shade. Probably the best way to grow grapes, however, is in rows, planting the vines from six to eight feet apart each way and training on trellis.

112. BRIGHTON.—Bunch large, shouldered; berries medium large, dark red, tender; rich, sweet and of best quality. Vine vigorous and hardy. Price 30c each; 10 for $2.50.

113. CAMPBELL EARLY.—Black with purple bloom; bunch and berries large. Juicy with rich, sweet flavor; almost seedless; hardy and vigorous growth, and very productive. Price 30c each; 10 for $2.50.

114. CONCORD.—The most popular grape in America. They grow in full clusters of large berries, with a thin skin; flesh tender, sweet and juicy. Vine a strong grower and very hardy. Price 25c each; 10 for $2.00; 100 for $15.00; 1,000 for $100.00.

115. DELAWARE.—One of the finest table grapes. Bunches not large; compact and well shouldered. Berries rather small, juicy and sweet, without any hard pulp. Price 30c each; 10 for $2.50; 100 for $20.00.

117. IVES SEEDLING.—Black. Bunch long, medium to large, compact; berries medium; skin thick and tough; flesh sweet. It is a good market variety and is highly esteemed for red wine. Vine hardy, very vigorous and healthy. A good shipper. Ripens medium late. Price 40c each; 10 for $5.00; 100 for $25.00.

118. MOORE EARLY.—An extra large grape of extraordinary fine sweet flavor. Excellent for home use and one of the hardiest for the far north, ripening about two weeks ahead of the Concord. Berries of large size; succeeds everywhere. A fine market grape. Price 35c each; 10 for $3.00; 100 for $25.00.

119. NIAGARA.—The very best white grape. Berries large, light greenish yellow; very fine for table use; very prolific, hardy and of fine flavor. Fruit keeps well, if properly handled. Price 35c each; 10 for $3.00; 100 for $25.00.

120. SCUPPERNONG.—This variety is purely Southern, and is of no value to the Northern or Western states. The vine is free from all diseases; fruit never decays. Plant twenty to thirty feet apart in rows. Train on an arbor or trellis and never trim. The product is very large and cultivation reduced to simple form. Price 50c each.

121. WORDEN.—A splendid grape of the Concord type, larger, better quality and earlier. Vines vigorous, hardy and productive. A valuable market sort. Price 35c each; 10 for $3.00; 100 for $25.00.

115A—CYNTHIANA—THE WONDER GRAPE

Absorbs More Iron From the Soil Than Any Other Plant Known

The juice of this grape is one of the most healthful and health-restoring beverages that can be procured. No other grape juice compares with it. Read the following letter from W. H. Morse, M. D., Consulting Chemist of Hartford, Conn., and Fellow of The Incorporated Society of Science, Letters and Art of London:

Gentlemen:

The juice of the true Cynthiana Grape is most notably valuable as being a ferruginous tonic. There is "grape juice" galore in the market that is of no real tonic value—good beverage, beyond a reasonable doubt, but not of any value as of avail as facilitating constructive metamorphosis. So if I were writing on "A Preference in Grape Juice" (to Mr. Bryan, perhaps,) I should suggest getting it from the Cynthiana Grape. I hope you are selling the vines, and in every case of sale, it seems to me that you would do well to especially emphasize the juice as healthful and health-restoring.

Heartfully yours, W. H. MORSE.

Don't buy patent medicines but grow and use the juice of Cynthiana Grape for your ills. You will enjoy drinking it too.

Our supply of vines is limited, so order early. Price, 50c each; 5 for $2.00; 25 for $6.00.

Booklet "How to Make Grape Juice" free with order for 25 or more Cynthiana Grape Vines.

</table>
IN presenting you with our 1924 catalog we wish to express our appreciation to our many customers for their orders last year. Our business last year far exceeded our expectations and we are especially glad to have orders from so many new customers. We believe we can best show our appreciation of your business by furnishing you with the best trees, plants and seeds that your money can buy and to that end we have made many improvements in our equipment and organization. The photo to the right shows our new building in which our offices, seed store, mail-order department and nursery are located. Here your order is received and filled, all under the same roof, which saves time and assures you of prompt delivery.

In our building is located a substitution of the post office and all parcel post shipments and other mail goes from here direct to the trains. We are just across the street from the R. R. Station. We have also added more than 300 acres of the best Ozark nursery land with suitable packing houses and other equipment.

You can place your order with us for nursery stock and seeds knowing you will get good service and the best stock obtainable anywhere—**you get what you order**.

Your order will be appreciated again this year. May we have it early?

Arkansas Seed & Nursery Co.

---

**Time of Shipment**

Many people who order Trees, Plants and Seeds from some Nurseries do not get their order when they want it. We can most always send out shipments at any time wanted as we have fine facilities for handling our stock. We have large frost-proof packing houses and are advantageously located for shipping both North and South.

**Up-to-Date Equipment.** Ours is one of the best equipped nurseries and seed houses in the United States. Every time-saving device is used in offices, nurseries, seed house and shipping rooms. We operate our own printing plant, have our own sawmill for making box lumber for shipments. You are assured of good service with such equipment as we have and stock at the lowest possible price, quality considered.

**How to Make Remittance**

Checks look good to us. Do not go to the trouble or expense to buy a money order but send your personal check. This is a good receipt and the safest way of making remittance. If you do not care to send check it would be better to buy money order than to send money loose in the mail.

---

**Order Early—It Will Pay You**

Many people who postpone until the last moment to place their order fail to get their stock. Be sure to place your order early so that you can get what you want and get it planted at the proper time.

**Planting Guide.** To help you get started right with our seeds, bulbs, etc., we have prepared a cultural guide which we send free with order for seeds amounting to $2.00 or more. This is a valuable guide.

**Trees and Plants Free from Insects and Disease.** Our nurseries have been inspected by our State Entomologist and have been found free from insects or diseases. This assures you of good, clean, healthy stock sure to grow. A copy of our Certificate of Inspection by our State Entomologist furnished with every shipment.

**How to Order—It's Easy**

All orders for $5.00 or more are sent charges prepaid. If your order is less than $5.00 and you wish it sent by parcel post or prepaid express, add 10c to each dollar to prepay charges.

---

**SATISFACTION OR YOUR MONEY BACK—THE STRONGEST GUARANTEE EVER WRITTEN**
Our trees are growing and thriving and producing fruit in every state in the Union. We propagate them from the choicest strain that it is possible to select. The soil around Fayetteville is so admirably adapted to fruit growing that the trees naturally develop very sturdy roots, and every scientific method is used to further this development, which enables the newly transplanted trees to establish themselves quickly and make rapid and continuous growth.

Another one of our Storage Cellars.

A group of our office employees in front of our building.

I received your assortment of small trees about one year ago. I want to say they are every one living and as pretty a lot of trees as I ever saw. I am looking forward to lots of fruit in the years to come from the lot.

Yours truly,
C. R. LLOYD,
Texas.

Received check for damaged plants yesterday. Thanks for promptness. Hope to have more plants next year. Your Company has treated me right and I appreciate it. May be interested in a few trees next year.

Yours respectfully,
E. H. WILSON,
California.

One year ago you sent me a one-year-old Delicious apple tree. It was the best one I ever set and made the greatest growth of any. I enclose herewith a club order for 100 more similar Delicious trees.

Yours very truly,
S. O. WILLARD,
Missouri.

Some few years ago I ordered 50 apple trees from your company. They are all fine and dandy, are bearing well and absolutely true to name. I was extra well pleased with the 22 trees just received and thank you greatly for the compliment tree which you sent me. I would not let a fruit tree agent even talk to me as long as your company exists. I am telling my neighbors about your stock and have indirectly sent you several orders from my valley. I am enclosing you my order for a few more trees that I find room to set. The superb apricot tree which is included in the order is not included in the check as I could find no price for it. However, when you send me the price of it I will send you the remittance at once. Again thanking you for your promptness and good stock, I am

Very truly yours,
FRANK P. EWTON,
Tennessee.

A digging crew at work. Our digger is operated by ten mules. We dig deep and get all the roots.

Ozark grown trees make money for all who plant them. The soil and the climatic conditions where we grow these trees are favorable to the growing of stock that is both hardy and vigorous, with well developed root systems. In short, our Arkansas grown trees are trees that thrive in every section. This season we are growing 500 acres of fine fruit trees. Since we are growers and not merely brokers and ship to you direct at rock bottom prices, you can be sure our varieties are true to name for we do not substitute them.

"By Their Fruits Ye Shall Know Them"
ARKANSAS GROWN APPLE TREES
FROM THE HEART OF THE OZARKS

Here are the low prices we are making this year on our high grade Apple Trees, finest in the world. Your money back if not thoroughly satisfied.

Summer and Early Varieties

1. EARLY HARVEST.—Tree healthy, vigorous and a good bearer. Fruit yellow, with sub-acid flavor, flesh tender and juicy.

2. HORSE.—Large, yellow and good for kitchen use.

3. LIVELAND RASPBERRY.—Good commercial variety and one of the best early market apples. Tree hardy, vigorous and long-lived. Bears young. Fruit medium size, clear waxen white, striped with crimson. Flesh crisp, juicy and almost sweet.

4. MAIDEN BLUSH.—A fine variety for home use and market. Yellow with red cheek, large, tender and very juicy. Tree medium size, vigorous and hardy.

5. RED JUNE.—Medium red; flesh white, tender; good flavor. Abundant bearer.

6. RED ASTRACHIAN.—Tree vigorous, hardy and good bearer. Fruit large and handsome, crimson, rather acid, and a good cookor.

7. SWEET BOUGH.—Large, pale yellow, popular, and high quality. A good market variety.

8. SUMMER QUEEN.—Very large, yellow with stripes.

9. YELLOW TRANSPARENT.—One of the best early market apples. Trees medium size, vigorous and hardy, and will bear at two and three years.

Autumn or Midseason Varieties

10. DUCHESS.—Tree hardy, fine grower and abundant bearer. Fruit large, yellow, tender and juicy. Good commercial variety.

11. MAMMOTH PIPPIN.—Large green sub-acid; quality best.

12. ROME BEAUTY.—Large size, with red stripes; tender, juicy and good flavor. A good grower, bears heavily every year. Very desirable for either home or market.

Winter or Late Varieties

13. ARKANSAS BLACK.—Dark red, almost black, good keeper. Tree comes into bearing young.

14. BLACK BEN DAVIS.—An apple of the Ben Davis type; large red apple; a fine market apple. Tree hardy and vigorous.

15. BEN DAVIS.—Large, round, bright deep red striped; flesh, white sub-acid, firm and juicy. Tree vigorous, upright and productive.

16. CHAMPION.—Bright red, medium size, good keeper and good bearer. Tree hardy and vigorous. A fine commercial variety.

17. DELICIOUS.—Almost too well known to need description here. Fruit large; dark red; fine-grained flesh; crisp, juicy and of high quality. A splendid shipper and prolific bearer. The Delicious Apple is very distinct in appearance and its unusual quality and appearance combined makes it invaluable for both commercial and home orchard.

APPLES  
Winter Varieites—Continued

18. GANO.—Similar to Ben Davis, but deeper in color, and better in quality. Tree very hardy and vigorous. A rapid grower. An early, annual and prolific bearer. A valuable late winter apple.

20. INGRAM.—Medium size, yellow sprinkled with bright carmine stripes; flesh, juicy and of excellent flavor.

21. JONATHAN.—A beautiful red apple, highly flavored and of excellent quality, being tender, juicy, and rich. A splendid family apple and one of the best commercial varieties. Tree long lived, productive and an early bearer.

22. KING DAVID.—Medium size early winter apple; very dark rich red; flesh is firm, juicy and of good quality; a good slipper. Tree is very hardy, vigorous grower, comes into bearing very young.

23. LIMBERTWIG.—One of the best keepers, very hardy and productive, rich flavor.

24. MAMMOTH BLACK TWIG.—Fruit large, round, dark red, almost black when fully matured. Tree a vigorous grower and abundant bearer.

25. McINTOSH RED.—Dark red; best quality, juicy and refreshing. A good annual bearer of handsome fruit.

26. STAYMAN WINESAP.—Tree hardy, vigorous and spreading and an abundant bearer. Fruit dark rich red, tightly striped. Flesh is firm, crisp and juicy. The Stayman is an apple that is not only desirable in the home orchard, but is one of the most profitable when grown for commercial purposes.

27. WINESAP.—Medium size, smooth dark red; flesh yellow, crisp, firm, with a rich, high flavor. Fine in quality and a good keeper. Tree a strong grower, root-growth exceptionally strong; an early and productive bearer.

28. WHITE WINTER PEARMAIN.—An old favorite and a very desirable variety for home orchard. Good keeper.

29. YORK IMPERIAL.—Medium to large, oblong; color white, shaded with crimson; flesh firm, crisp, juicy and sub-acid; a good bearer and keeper; one of the best winter apples.

Crab Apples
Valuable for Market

Few understand the value of the crab as a market fruit. They always command a good price and find ready sale. They stand shipping any distance. Packed in strawberry crates they sell for more per crate than strawberries. The yield per acre is much more. One of our customers, who is an extensive fruit grower, says that the most profitable apple that can be grown are the improved varieties of crabs.

Crab Apple trees are hardy as an oak. Will grow anywhere. You can make no more profitable investment than to plant an acre of crab apples. We recommend planting them sixteen feet apart, which is 160 trees to the acre.

30. WHITNEY.—One of the largest and handsomest Crabs. Flesh firm, juicy and rich. A great bearer and extra hardy. Tree a vigorous and beautiful grower. Excellent for cider and cooking. Season early, 50 cts. each.

31. HYSLOP.—A handsome Crab of excellent quality and unsurpassed for general purposes. Flesh yellow, with a sub-acid, pleasant flavor. Tree highly ornamental. Season late. 50 cts. each.

32. SIBERIAN.—Vigorous grower. Highly flavored and juicy. One of the best. 50 cts. each.
Peaches

See Color Plates, Pages 2 and 4

ONE ACRE OF PEACHES WILL PAY FOR MORE THAN TEN ACRES OF FARM CROPS.

Peaches succeed nearly everywhere. They thrive and pay where many other fruits are not successful. On nearly every farm there are several acres of unused land that could be profitably let to peaches. Clay hillsides, thin and sandy land that is too weak to produce corn or alfalfa will grow excellent peaches. Almost any soil will do so long as it is well drained. Peaches cannot succeed with wet feet. When good peach orchards are netting $400 per acre and more, we wonder why so many farmers overlook planting peaches. Nearly every variety will bring you a profitable crop not later than the fourth year. Our Peach trees will pay because they are bred from young bearers. Choice of variety depends somewhat on location, but if selected from the list you won't go far wrong.

Special price on Elberta in large lots for commercial planting.

FIRST RIPENING

32. MAYFLOWER.—Earliest peach known, semi-cling, medium size, color bright red; ripens well to the seed. Young and upright good grower.

34. RED BIRD.—A fine early Peach; bright glowing red. A good shipper. Flesh juicy, firm and most delicious peach flavor imaginable. Tree hardy and vigorous.

SECOND RIPENING

35. ARP BEAUTY.—Yellow skin and flesh, red cheek; semi-cling.

36. CARMAN.—Large creamy white or pale yellow with deep blush; flesh tender, fine flavor and quite juicy. Very hardy and productive. Good shipper.

37. EARLY CRAWFORD.—A large yellow Peach of splendid quality; strong grower and prolific fruiter.

38. GREENSBORO.—The largest and most beautifully colored of all early Peaches; prolific and of excellent quality; juicy; freestone but adheres slightly.

THIRD RIPENING

40. BELLE OF GEORGIA.—Very large, white Peach with red cheek; flesh white, firm, and excellent flavor. Tree rapid grower and very productive.

41. CHAMPION.—Fruit large, beautiful in appearance; flavor delicious. Skin creamy white with hardy and productive.

42. EARLY ELBERTA.—Large freestone Peach, red cheek, yellow fleshed, with a delicate yellow peach flavor and odor. A heavy and regular cropper.

43. MAMIE ROSS.—White, splashed with red. Semi-cling to free when fully ripe.

44. MOUNTAIN ROSE.—Medium, roundish, whitish, nearly covered with a pretty red. Productive.

FOURTH RIPENING

46. ELBERTA.—The most popular Peach grown. Large, yellow with red cheek; flesh yellow, firm, juicy and of high quality. Exceedingly prolific, sure bearer and hardy.

47. FITZGERALD.—Flesh rich, deep golden yellow; very firm. Ripens between Early and Late Crawford.

48. HILEY.—Large, creamy white, highly colored cheek. Similar to Belle of Georgia.

49. J. H. HILE.—Large round, firm; white with red cheek; flesh white, juicy, and very good. Hardy and very productive.

50. OLD MINER FREE.—Large, yellowish white with deep red cheek. Tender and juicy, very hardy and productive.

51. ROCHESTER.—A new yellow freestone variety, large, yellow, sweet, juicy and of delicious flavor. Prolific bearer.

52. TRIUMPH.—Large yellow freestone, nearly covered with red; flesh yellow, juicy with a very agreeable flavor; strong, vigorous, and very productive.

FIFTH RIPENING

54. CHINESE CLING.—Hardy and productive; flesh white, red at the stone, very juicy, melting, with a rich, excellent flavor. Clingstone.

55. CRAWFORD LATE.—Superb yellow Peach of large size and excellent quality; great bearer. One of the finest late varieties.

56. CROSBY.—Fine, bright yellow peach, streaked with carmine. Freestone.

57. INDIAN.—Large, dark claret, very downy, flesh deep red. Much esteemed for picking and preserving.

58. NIAGARA.—Large, yellow and red. Said to be better than Crawford.

SIXTH RIPENING

60. HEATH CLING.—Very large, oblong, creamy white, with a faint blush; flesh greenish white, tender and juicy. One of the finest for canning purposes. Tree a good grower and excellent bearer.

61. KUMMEI'S OCTOBER.—Large, yellow, mottled red. Best late freestone.

62. LEMON CLING.—Large oblong, yellow with red cheek; flesh yellow, firm, with a rich sub-acid flavor.

63. SALWAY.—Strong grower, productive, yellow, well known and very popular.

64. STINGY OCTOBER.—Large oval, creamy white, with fine blush; flesh white and rich.

SEEDLING PEACHES

65. COMMON SEEDLING PEACHES.—Extra fine trees. Plant some of these trees.

Price 30c each: 10 for $2.50; 100 for $15.00.
Pears

See Color Plates, Page 47.

The Pear is one of the most luscious of the tree fruits and by planting both early and late ripening varieties they may be had in fresh condition from July until mid-winter. When properly grown they are one of the most profitable fruits. The fruit should be allowed to remain on the tree as long as fully ripe, as it then loses its flavor. Summer Pears should be picked at least a week or ten days before ripening and fall varieties two weeks or more. When laid away to ripen they will attain their finest flavor.

The varieties offered are the very best and hardest and kinds that will come into bearing soon after planting. They may be planted from eight to twelve feet apart.

3 to 4 ft., 60c; 4 to 5 ft., 75c.

95. DUCHESS.—A dependable cropper, often fruiting the first season. Fruit large, frequently weighing a pound. A profitable market pear. Ready for use in October and November.

96. CLAPP'S FAVORITE.—A beautiful fruit of good quality. Tree is an upright and vigorous grower and bears heavy crops of large, Juicy pears, with a very agreeable flavor.

97. FLEMISH BEAUTY.—Large size, yellow when ripe, with patches of brownish red; rich, sugary flavor. Tree is first-class in hardiness, productivity and early bearing.

98. WILDER.—Medium size, yellow, with dark red cheek and good for dessert. Tree very attractive, of vigorous and symmetrical growth.

99. VERMONT BEAUTY.—Medium, roundish, yellow, with carmine cheek. Flesh exceedingly fine, sweet and juicy; a splendid table pear. Tree makes strong, healthy growth and bears early.

Cherries

See Color Plates, Page 47.

The Cherry tree is one of the most ornamental of the fruit trees and one of the earliest of the tree fruits to ripen. On account of its earliness and fine flavor it is in great demand. The trees thrive and do well under the most ordinary treatment and no lot owner should be without this very luscious and early fruit. Of all the fruit trees the Cherry should be given plenty of room so as to develop its branches low down so the fruit can be easily reached.

Prices, 3 to 4 ft., 80c each, 4 to 5 ft., 75c each, 10 for . . . . . $7.50

Our Fruit Trees are grown under ideal growing conditions as verified by the U. S. Government Reports. It pays to plant our thrifty, healthy trees.

105. COMPASS CHERRY.—Absolutely hardy everywhere. The cherry was originated at Springfield, Missouri, by the late Mr. A. M. Molyneaux. Large, red, acid cherry; very valuable for cooking early in the season. Ripens through June. A free grower, hardy, healthy, and very productive.

106. DYEHOUSE.—Ripens a week before the Early Richmond; fine quality and very productive.

The Compass Cherry is a Wonderful
Producer—Try it

Arkansas Seed and Nursery Company, Fayetteville, Arkansas
Plums

See Color Plates, Page 47.

Plums are easy to grow anywhere. Yet they are not grown on many farms. There is a healthy demand for the fruit. The trees produce abundantly. Everyone likes plums. They are good shippers. All markets can be greatly extended and developed. Plant a plum tree or two in your chicken yard. An ideal place for them.

**Price of Plum Trees, 1-yr. 50c; 2-yr. 75c.**

75. **BURBANK.**—Better adapted to any soil and climate than any other plum grown. A profitable commercial plum. Requires little care. Ripens in mid-season.

76. **GOLD BEAUTY.**—A large variety in a rich yellow. Flesh is very firm and sweet. Always is in big demand.

77. **PooLe'S PRIDE.**—Seedling of Wild Goose. Very hardy; good bearer.

78. **RED JUNE.**—An early market plum of large size, with deep vermillion red color, with light lemon yellow flesh, very firm, slightly sub-acid. Free from rot. Ripens in early August.

79. **SHIRO.**—Medium sized, yellow and very sweet. The best quality of any of the Japan plums. Recommended highly for garden planting.

80. **SHROPSHIRE DAMSON.**—Medium; dark purple flesh; grown largely for preserving purposes. Probably the best preserving plum.

81. **WICKSON.**—A large, long, heart-shaped, deep-maroon red cling plum, with small pit. Tree an upright, vigorous grower. Excellent keeper and shipper. Planted largely for market. Early September.

82. **WILD GOOSE.**—Deep red, very sweet and juicy. Tree a hardy and vigorous grower and an abundant bearer.

Prunes

83. **FRENCH PRUNE (Fellenberg).**—A fine late plum. Fruit large, handsome, of oval shape and purple color. Excellent for drying or canning. Ripens in September. Price $1.00 each.

84. **GERMAN PRUNE.**—Esteemed for drying and preserving. Large, long-oval, purple with a thick blue bloom, firm flesh, sweet and pleasant, separating from the stone. Moderate to vigorous in growth. September. Price $1.00.

85. **ITALIAN PRUNE.**—Large, dark, purple, flesh greenish yellow. Price $1.00 each.

Quince

88. **ORANGE.**—Large, delicate flavor. Bears abundantly while young. Flesh cooks as tender as an apple and without hard spots and cores. Price of Quince Trees, $1.00 each.

Apricots

**THE SEEDLING RUSSIAN APRICOT**

A most delicious fruit of the plum species. It will pay you to plant a few apricots about the place for home use. Price 2 to 3 ft., 40c; 3 to 4 ft., 50c.

100. **ALEXANDER.**—An immense bearer. Fruit yellow, flecked with red. Very beautiful. Price 75c each.

101. **EARLY GOLDEN.**—Fruit beautiful bright yellow, large size, prolific and hardy; tree upright, strong grower. Thrives on any soil. Price $1.00 each.

102. **ROYAL.**—A fine large French variety. It is quite high flavored and ripens a week or ten days earlier than the Moorpark; flesh pale orange, firm and juicy, with a rich flavor. Price 75c each.

103. **SUPERB.**—Seedling from Kansas. The best flavored, most productive hardy apricot yet produced. Quality is excellent. Medium size; light salmon color. Price $1.00 each.

104. **MOORPARK.**—One of the largest and finest Apricots, yellow with a red cheek, flesh orange, sweet, juicy and rich—parts from the stone. Very productive. Price $1.00 each.

The Nectarine

86. **RED ROMAN.**—This variety is particularly recommended for home planting. The fruit is very firm and keeps as well as a Peach. It has a delicious flavor, being rich in sugar, tender and juicy. Price 50c each.

87. **NEW WHITE.**—This is nearly round with tender white flesh, having a rich vinous flavor, and a small stone. Price 50c each.
Strawberries

Everbearing Strawberries

FOR STRAWBERRIES FROM JUNE TILL FROST.

Progressive

The idea of having fresh, well flavored strawberries from June to November would have been ridiculed a few years ago. But the Everbearing Strawberry is here in actual fact. It has been tested and proven. It has made good in both commercial and home garden plantings in widely varying parts of the country. The first crop is borne early in the season at the same time as the standard or June bearing varieties, then there is a continuation of blooming, producing ripe fruit throughout the summer, if conditions are favorable. Following this is another blooming period in the late summer and a large crop follows until severe frosts come. We recommend that you plant a few of one or both of the tested varieties described below.

66. PROGRESSIVE (S).—Said to be the best of the fall bearing varieties; immense plant maker. Fruit medium size, high colored, red to the core; if picked before too ripe will ship well. See cut on page three. $1.00 for 25; $2.50 per 100; $20.00 per 1,000.

67. SUPERB (Perfect Flower).—Plants are strong and stand the winter well after producing a heavy crop of fruit from about August 15th to November, according to season. The fruit of Superb is very large, round, rich, dark colored, glossy, attractive and smooth. Each berry is of good shape and ripens all at once. $1.00 for 25; $3.00 per 100; $20.00 per 1,000.

Spring Bearing Varieties

Every farmer can give some acreage to Strawberries with profit. We cannot predict the future, but to us it seems wise that everyone devote as much acreage to small fruits as his land permits, for it will pay him.

Prices paid for strawberries, raspberries, grapes and other small fruits undoubtedly will remain high. As high as $500.00 to $750.00 has been brought from an acre by fruit growers in a single season. What other crop would pay any such big returns?

This year we have grown a large acreage of strawberries—and have millions of as fine plants as you ever laid your eyes on.

68. KLONDYKE.—The hardest and most popular strawberry known; very productive; a great market variety. $1.00 per 100; $7.50 per 1,000.

69. LADY THOMPSON.—A well-known variety that is quite popular, running medium to large size. A splendid market berry because it is a good shipper and keeps well in storage. $1.50 per 100; $10.00 per 1,000.

70. SENATOR DUNLAP.—One of the best for preserving and canning, making a rich red syrup and the berry retains its bright red color. The plant is one of the hardest and most vigorous. $1.50 per 100; $10.00 per 1,000.

71. MITCHELL'S EARLY.—An excellent flavored berry that is very productive and one of the best for home planting. $2.00 per 100; $15.00 per 1,000.

72. AROMA.—The most profitable and dependable strawberries grown. The flavor is deliciously aromatic and the flesh is firm and velvety, of smooth solid texture. $1.50 per 100; $10.00 per 1,000.

73. GANDY.—An excellent berry with a brisk tartness that is very pleasant. The flesh is very firm so that the berry stands shipping well. $2.00 per 100; $15.00 per 1,000.

131. GIBSON.—In Berrien County, Michigan, the second largest strawberry county in the world, two-thirds of all the strawberries grown are the famous Gibson. The berries are extra large, of a beautiful red color and extra fine appearance. Postpaid, 12 for 40c; 60 for 85c; 100 for $1.50.
Raspberries

Coming immediately after Strawberries, when there is a dearth of other fresh fruit, Raspberries are equally desirable for planting in the garden for home use and in the field for market and in the home, are easily cultivated. Beds seldom require renewing. Their season of ripening is long. The fruit bears transportation well, and aside from its demand for immediate consumption, it brings highly remunerative prices for drying and canning.

Immediate Returns

$200 to $900 From One Acre.

Black Pearl

We do not claim that raspberries will make you a fortune without work, but do claim that you can make good money growing raspberries. Beginning to bear the next year after planting, they bring quick returns. Raspberries grown either alone or in combination with other farm products will make you handsomely for your labor and prove a profitable investment. You will always find a strong local demand for choice raspberries of both red and black varieties. They will stand shipping fully as well as strawberries, and the city markets are never fully supplied with this delicious berry. Under favorable conditions the raspberry crop will bring a cash return of several hundred dollars per acre. We have reports of $600.00 an acre. Of course this was extra good return and could not be expected unless conditions were very favorable. We can assure you, however, that you will find raspberries a profitable crop.

Raspberries ripen at a time when the appetite of the people is demanding fruit, and they will fill in the gap between strawberries and blackberries. Strawberries are ripe in July, raspberries are at their finest in August, blackberries in September. The market is always hungry for any fresh fruits that can be grown in this late season. A few cases of raspberries shipped in September can bring a handsome profit. They are easy to grow and require less labor for marketing than strawberries do.

Don't overlook the wonderful St. Regis Everbearing Red Raspberry on inside front cover. It's a wonder in production and high quality of fruit.

Red Varieties

122. BRANDYWINE.—Large; bright red; very fine. Valuable for market on account of its fine shipping qualities. 10 for 75c; 100 for $5.00.

123. TURNER.—A beautiful red berry of fine flavor and excellent quality. One of the hardiest and most productive varieties known. 10 for 75c; 100 for $1.00.

124. MILLER'S RED.—Vigorous and sturdy; very early; fruit large and profuse, beautiful and brilliant in color. 10 for 75c; 25 for $1.50; 100 for $5.00.

125. KING.—Large, crimson; firm; flavor very good; hardy. A new variety. An abundant and early bearer. 10 for 75c; 100 for $5.00.

126. LOUDEN.—Ripens with the earliest and hangs to the last. In productiveness it is beyond any red raspberry known, and is a famous shipping berry. As hardy as the Turner and is the finest for quality. 10 for 75c; 25 for $1.50; 100 for $5.00.

127. CUTHBERT (The Queen of the Market).—Large, conical; deep rich crimson; firm, of excellent quality. A vigorous grower, entirely hardy and immensely productive. "I regard it as the best raspberry for general culture."—Charles Downing. 10 for 75c: 25 for $1.50; 100 for $5.00.

Black Raspberries

129. BLACK PEARL.—This new blackcap was introduced a few years ago from Kansas and it certainly is a winner. The fruit is glossy jet black, very large, firm and plentiful. It ripens with the very earliest and comes on so fast that its immense crop is gone inside of fifteen days from time the first berries ripen. The canes are healthy, vigorous and hardy, and we regard this as one of the very best varieties in our list; it certainly is the best very early variety, either for the home garden or for market. You will miss something really good if you fail to include this in your order. 20 for $1.00; 100 for $4.00; 1,000 for $20.00.

130. KANSAS.—A seedling originated at Lawrence, Kansas. Berries very large, jet black and of the very best quality. It stands the trying climate of Iowa. 20 for $1.00; $4.00 per 100.

Choice Red Raspberry

132. EARLY KING.—This is an extra early red raspberry. It is a week or ten days earlier than the old "Standby" Cuthbert. The berries are very large, bright-red, firm and easily picked. The canes are strong and perfectly hardy. One grower says Early King is the earliest and most beautiful red raspberry we have ever grown. As a market variety it is a money-maker as you get the early market ahead of the big shipment of other varieties. Price $3 for 20c; 12 for 85c; 50 for $2.75; 100 for $8.00.

133. CUMBERLAND (The "Business Black Cap").—Biggest black raspberry grown. This is offered with the assurance that it is the most profitable and desirable variety for home or market. Cumberland is very hardy everywhere. Extra productive, being the heaviest bearing variety in cultivation. Fruit is extra large, jet black, and of superior quality. Ripens medium early. This is the Standard Black Cap Raspberry, being more extensively grown than any other variety. Price $2 for 25c; 12 for 85c; 50 for $2.75; 100 for $5.00.

Choice Black Cap Raspberry
How to Grow McDonald Blackberry

Blackberry By-Products
Besides being eaten fresh, the blackberry is dried, canned, made into jam, jellies, and other preserves, and pressed to extract the juice. Dried blackberries are not used as much as formerly, because more consistent methods of preserving have been developed.

The introduction of the lacquered-tin can, which does not discolor the contents as does the ordinary tin when it comes in contact with this acid fruit, has assisted in the rapid expansion of the blackberry-canning industry. The berries are first preserved in a sugar solution or, as before customary, preserved without sugar by heating. This latter process is very expensive and is more satisfactory for the trade. It can be used for many purposes for which berries preserved with sugar would be unsuitable.—From Bulletin No. 643, U. S. Department Agriculture on "Blackberry Culture." Send for this Bulletin. It is free.

Blackberries Pay Big Dividends
There is a great and increasing demand for blackberries. There is no fruit capable of yielding greater profits. There will usually be from 150 to as high as 250 cases of 24 quarts from an acre, and that is usually consistent to figure on an average of $100.00 to $150.00 per acre after paying for picking, boxes and express.

For field culture plant three feet apart in rows six feet apart. For garden culture plant four feet apart in rows five feet apart. If planted between the rows of young trees in an orchard to maturity, they will produce fruit two seasons after planting.

Lucretia Dewberry

134. SNYDER.—This popular hardy blackberry is known everywhere and more largely grown than any other because of its extreme hardiness and dependability. Where other varieties often fail by winter-killing, Snyder on for an abundant crop. Every fruit grows large, sweet and free from core. Price 25c; 12 for $1.00; 50 for $3.50; 100 for $6.00.

Dewberries
A variety of Blackberry that trails on the ground. In size and quality the fruit excels the Blackberry; very productive and remarkably hardy. Kind should be covered with straw or earth over winter in cold climates. The fruit of the Dewberry is highly prized as a market fruit, owing to its large size and quality.

144-A. AUSTIN.—Berries very much larger than those of any other Dewberry or Blackberry. It requires no trellis or stakes. The fruit is jet black and of very superior quality and flavor. For productivity it outrivals all Dewberries. 10 for 5c; 100 for $4.00; 1,000 for $20.00.

144. NEW DEWBERRY FERMO.—Much like Lucretia, but very distinct, and exceedingly early, being seven to ten days ahead and all cleaned off when Lucretia is beginning. Quality and size very fine. A Lucretia patch. Price 10c each: $1.00 per dozen; $5.00 per 100; $40.00 per 1,000.

135. LUCRETTA.—The most largely grown of all the dewberries for home or market. It is a trailing species of blackberry. It is earlier than the earliest blackberry and larger than the largest of them. These trailing varieties are hardy everywhere and free from disease. The fruit is superb, large and handsome. Jet black, sweet and melting. If you have never grown dewberries try the Lucretia. Price 25c; 12 for 5c; 50 for $2.00; 100 for $5.00; 1,000 for $25.00.
Arkansas Native Seedling Fruit

117. ARKANSAS SEEDLING GRAPE.—A large black grape of delicious flavor, a very prolific and annual bearer. The original vine has not missed a crop for several years. Price 25c each; $2.00 per dozen.

118. SEEDLING PEACH.—Genuine Old Time American Peach, grown from selected seed, not usual-anted to reproduce true. Very desirable for hardi-ness; prolific bearer. Price 25c each; $2.00 per dozen.

119. SNOW PEACH.—A white freestone peach of medium size, grown from selected seedlings. The tree can be distinguished from any other tree by its green bark. Price 25c each; $2.00 per dozen.

120. ARKANSAS SEEDLING CRAB.—We recommend this variety for its hardiness. The hardy. Should be planted near other sorts to fruit well. Price, 10c each; $1.00 per dozen.

121. IMPROVED DWARF JUNEPEACH.—A good substitute for the large or Swamp Huckle-berries. The fruit is borne in clusters, and is reddish-purple in color and changing to a bluish-black. In flavor it is a mild rich subacid, excellent as a dessert fruit or canned. Price 25c each; $2.00 per dozen.

152. PAW-PAW or "ARKANSAS BANANA."—A small tree with purple or whitish flowers and handsome foliage. The large fruit is edible and improves by cultivation. Hardy as far north as the middle of Nebraska. Worthy of more extensive planting. Very desirable as an ornamental tree. Price of first-class trees $1.00 each.

150. BANANA.—A small tree with purple or whitish flowers and handsome foliage. The large fruit is edible and improves by cultivation. Hardy as far north as the middle of Nebraska. Worthy of more extensive planting. Very desirable as an ornamental tree. Price of first-class trees $1.00 each.

153. SASSAFRAS.—Ornamental deciduous tree with alternate, simple or 3-lobed leaves and small yellow flowers appearing in few-flowered racemes in early spring and followed by ornamental dark blue fruits on red stalks. Price, each 35c; 10 for $3.00.

154. OZARK HUCKLEBERRY.—This delicious little berry is a native of the Ozark Mountain range, remarkable for its fine flavor, is a choice fruit for jam, pies and fruit cake. Grows luxuriant, very hardy; a prolific bearer and when given a small amount of attention produces regular annual crops. Will grow on almost any kind of soil, and when once set, is there permanently, never having to be re-newed. Each, 15c; $1.50 per dozen.

Horseradish

145. We have a little booklet on growing and marketing Horseradish, telling all about this remarkable herb. Some of our customers are making $900 per acre in this work. The book is a little gem and will be sent you by mail postpaid for 10 cents.

146. MONEYMAKER HORSE-RADISH.—A new variety which is proving to be a valuable gold mine to market gardeners; a rapid grower of very large roots. It is much earlier than the old variety of Horseradish, and produces a much larger crop. Growers are able to get their crops into the market while prices are high, making it the most profitable of all root crops of this class. Easy to grow, ma-tures quickly and produces abundantly. Should be in every commercial and home garden. Price 10c each; $1.00 per dozen; $8.00 for 100.

Asparagus Roots

136. COLUMBIAN MAMMOTH.—Every home garden should contain an asparagus bed. Once planted it will require little care, and there is no other vegetable you can plant that will produce a greater quantity of desirable, nourishing food from the same space. An ordinary sized bed, 6 by 10 feet, requiring 50 roots to plant, when established will furnish a daily supply for three or four persons for two months or more each season. Plant roots and save one or two years' time as compared with planting seed.

Strong one-year roots, 12 for 40c; 50 for $1.00; 100 for $3.50.

Extra strong two-year roots, 12 for 60c; 50 for $2.00; 100 for $3.50.
Curnnts

131. FAY'S PROLIFIC.—True to its name, it is very prolific, with fruit of very large size. Popular with most growers, and does particularly well on light soils. Each 5c; 10 for $2.50; 100 for $20.00.

132. PERFECTION.—A new variety of great merit. One of the best on the market, being productive, early and large, and easy to pick. The flavor is very fine. In size it even exceeds the Fay. One of the most popular varieties, having won medals and diplomas wherever placed on exhibition. Each 50c; 10 for $4.00.

133. RED DUTCH.—An old, well known and popular red currant, with berries of medium size, dark red. A strong, tall, upright grower. Each 3c; 10 for $2.50; 100 for $20.00.

Gooseberries

GOOSEBERRIES CAN BE EASILY GROWN

Gooseberries always in great demand by canneries and on markets—are sure croppers when neglected. They can be shipped long distances and they keep well. Often are planted between the rows of trees in a young orchard. Bear second and third year.

138. PEARL.—Heavy bearer, strong grower. Each, 35c; 10 for $3.00; 100 for $25.00.

Fruit and Nut Trees

Ever-Bearing Mulberry Trees

These trees are exceedingly rapid growers, and come into heavy bearing in three or four years. Then for months they continue to ripen large quantities of fine, large fruit, good to eat and of the highest value for poultry and hogs, which can be penned around trees and kept fat and healthy. No raisers of chickens or poultry of any kind can afford to be without them if they cost $6 a tree.

166. DOWNING EVERBEARING.—This popular variety is a good grower and bears heavily. Each, $1.00.

167. HICK'S EVERBEARING.—A fine grower and a heavy bearer. Ripens through June, July and August. Each, $1.00.

168. ABUNDANCE EVERBEARING.—Very large, black, handsome; a sweet, rich and excellent variety. Each, $1.00.

169. RUSSIAN MULBERRY.—This tree has been planted very extensively in the western states for the past fifteen years, and we know of no other tree that will stand as much drouth and neglect and yet make a good growth each year. It makes a very good shade tree, holding its leaves late into the fall; and for a hedge, without thorns, it has no superior. Trees commence to bear at two years old; fruit resembles the blackberry, and will ripen from July to 1st of September. Each, 50c; 10 for $4.00; 100 for $25.00.

Nut Trees

171. STUART PECAN.—Pecan trees grow in almost any climate and on almost any kind of soil. The Stuart is a popular variety. It is hardy. withstands freezing weather. Produces a nut high in quality and of excellent flavor. Each, $1.50.

173. ENGLISH WALNUT.—These seedlings have been thoroughly tested. A soil that will grow apples is pretty sure to grow English Walnuts. These nuts sell at 40 to 60 cents per pound. Two or three-foot trees usually give the best results. Each, $1.50.

174. BUTTERNUT.—A fine native tree, producing a large, longish nut, highly prized for its sweet oily, nutritious kernel. Each, $1.00.

176. CHESTNUT, AMERICAN.—The fruit of this well-known native tree need hardly be described. We believe it is considered by all to be the best of all nuts, whether native or foreign. Each, $1.00.

176. FILBERT.—Tree of easy culture, succeeding well in almost any soil. Bears early and abundantly. Nut large, round, rich and of excellent flavor. Each, 50c.

Japan Persimmons

170. This royal fruit from Japan is deservedly popular. Most beautiful in foliage and fruit, and the most delicious of all fruit. It gains in the estimation of people everywhere when they learn its value. We offer vast collections of varieties, grafted on native stock. Each, $1.00.

Fig Bushes

177. This luscious and mildly laxative fruit, old almost as time itself—the fruit that refreshed and nourished the men who made history in Bible days, is about the easiest of all to grow. After the first year or two it needs no further attention unless you are far enough north for the branches to be winter-killed. Price, 50c.
Making the Home Grounds Attractive

The well arranged planting of trees and hardy plants transforms the house into a home, makes the place inviting and attractive and adds no small amount to its selling value. The appearance of the home grounds reflects the individuality and taste of the owner, so we should use as much care in making our surroundings attractive as we do the interior of the house. The amount spent for furnishing a single room will often pay for beautifying the entire grounds.

Shade Trees

How much would you give for some grand old tree—Maple, Elm or Poplar, located just where you want it? Plant shade trees for comfort and beauty—care for them, train them and watch them grow. It will add beauty to your premises and bring comfort to those who follow you. They will be fresh-dug and shipped straight to you.

185. ELM.—A large tree with spreading branches, leaves deep rich green. Extensively planted. Each, $1.00.

The Best Hardy Flowering Shrubs

Along the roadway, along the pathway, along the house foundation, as borders, for massing—one might mention a large number of special places where Shrubs will supply a well-defined need in planting scheme. Whenever the place may be, however, a wise selection from the list which follows will make possible flowering shrubs around the home or scattered over the estate from very early spring to late summer; and the ornamental season is prolonged by the subsequent white or brightly colored berries and the handsome varicolored leaves that form the characteristic autumnal garb of certain of the varieties. All shrubs are well established, two and three years old, and of a size to give immediate effect.

Prunus Pissardi.

The Price of all Flowering Shrubs is 75c each

200. ALTHEA or ROSE OF SHARON (Hibiscus Syriacus).—Large assortment, many shades of color and type of form and habit, both single and double.

201. CALYCANTHUS (C. Floridus).—Sweet scented purplish flowers in spring.

203. ELDER, GOLDEN (Sambucus Aurea).—The yellowish-green tints of foliage, the white flowers, and the fruits are very pleasing.

A few flowering shrubs, properly planted, will increase the value of your property.

186. MAPLE (sugar).—A good sized variety with wide, spreading branches and beautiful and abundant foliage. A rapid grower. A popular variety. Each, $1.00.

187. POPLAR (Norway).—A rapid growing tree of great hardiness. Used for wind-breaks, street trees and ornamental planting. Hardy and widely planted. Each, $1.00.

188. MAPLE (Hickory).—A fast growing, hardy tree, of medium size with spreading branches and abundant foliage. Frond-like leaves. Each, $1.00.

Prunus Van Houette.

210. SNOWBERRY, WHITE (Symphoricarpus Racemosus).—Similar to red, but berries white.

211. SNOWBERRY, WHITE (Symphoricarpus Racemosus).—Similar to red, but berries white.

212. SPIREA ANTHONY WATERER.—A new dwarf Spirea, variegated foliage. Flowers dark crimson; from May until frost.

213. SPIREA VAN HOUTTEI.—A strong shrub, covered with clusters of white flowers.

214. WHITE FRINGE.—A popular and much admired shrub of moderate growth and rounded form with large dark green glossy leaves and drooping panicles of beautiful white fringe-like flowers.

215. WIGEOLA ROSEA (Dierickia).—Long spikes of pink flowers; very hardy.

Plan to beautify your home grounds this spring. Plant early—order now.

Hydrangea Arborescens

Some plants used as a hedge.

Althea

Flowering shrubs, properly planted, will increase the value of your property.
Ornamental Vines

Everyone likes vines on a house. They are practical, beautiful and home-like. They give shade to a window, protection to a porch and beauty to a pillar. Some of the varieties will climb and stick tight to a brick wall.

I wish I could show you pictures of their beautiful colors. They are just ravishing. You get the golden yellow in the Honeysuckle; the orange-scarlet in the trumpet vine; the royal purple and violet in the Jackmanni Clematis; and the snowy white of the Panicle Clematis. A blooming vine at your front door is a constant benediction.

251. CINNAMON VINE.—Grow from a root like a sweet potato, which is ground for years. A rapid grower when well established. Each, 25c.

252. CLEMATIS, PURPLE (Jackmanni).—The queen of all vines for size and richness of flowers, which are violet-purple, 3 to 4 inches in diameter. Needs winter cover. Each, $1.00.

255. KUDZU.—A remarkable climber. Grows 70 feet in rich soil in one season. Fine for arbors, old trees and porches. Each, 60c.

256. HONEYSUCKLE (Scarlet Trumpet).—A good hardy climber. Free bloomer. Flowers the shape of a trumpet. Fine for a trellis. Each, 30c.

257. HONEYSUCKLE (Yellow Trumpet).—Similar to above except that flowers are yellow. Very hardy and vigorous. Each, 30c.

258. MATRIMONY VINE.—An old-fashioned hardy shrub vine, grows anywhere and covered with a profusion of scarlet berries. Good to cover walls or steep banks. Each, 30c.

259. MADEIRA VINE.—Grows from tubers like potatoes which should be taken up and kept in the cellar ever winter. Very easily grown and will thrive in any location or soil. Will grow 12 to 15 feet high. Waxy dark green, heart-shaped leaves and racemes of fine white bloom, very fragrant. One of the best vines for planting thickly along the front edge of a porch for quick effect. Should be bought by the dozen. Each, 30c.

260. TRUMPET VINE (Bignonia Radicans).—A robust, woody vine, climbing high and twining tightly with numerous roots along its stems. Great, leathery, trumpet-shaped flowers of orange-scarlet, clustering all the tips of the branches, bending them gracefully with their weight. In bloom nearly all summer. Extremely valuable for covering old stumps or walls; wherever a showy flowering vine is desired, it will be found most useful and pretty. Can also be grown as a small tree or bush. Each, 30c; 2 for 75c.

261. WISTARIA (Purple).—A rapid hardy-growing vine. Produces large drooping purple clusters of flowers in May or June. Each, 50c.

Our Trumpet Vine is One of the Best

Spring Bulbs

Cannas

255. THE PRESIDENT.—Height 4 feet. In color, a rich, glowing scarlet, and the Immense, firm, rounded flowers, 7 inches across when open, are produced on strong, erect stalks well above the large, rich green foliage. Superior to any other red variety. Price $25c each; 5 for $1.00; 25 for $3.00, delivered.

256. BURBANK.—The color is a pure, strong canary-yellow, with some red spots in the throat. The flower is often 4 to 5 inches across. 10c each; $1.00 per dozen.

257. SPECIAL KING HUMBERT.—The grandest Canna ever offered. Large heart-shaped clusters of purple madder brown over bronze, the dark ribs sharply defined, crowned with immense heads of orchid-like flowers. 16c each; $1.25 per dozen. SPECIAL $1.00 OFFER

258. WYOMING.—Seven feet, purple foliage. One of the most majestic Cannas. Blossoms orange colored, true orchid shape, with large rounded petals that flap and flutter in the breeze like glistening silken flags. 10c each; $1.00 per dozen.

We will make a selection of varieties for you for a complete Canna bed and will choose varieties that will please you. Will send you 20 bulbs for $1.00, enough for a large bed.

Chrysolora Chrysanthemum (See p. 19)
Gladioli

The Gladioli is the most satisfactory, the most desirable and the most popular of all garden bulbs. Nothing else of the kind costs so little, and nothing else grows and blooms so rapidly for anybody and everybody, in any soil or climate.

348. AMERICA.—Beautiful soft flesh pink, orchid-like in coloring. The most popular of all Gladioli.

350. PEACE.—Immense pure white flowers with a touch of carmine in lower petals. Excellent.

351. WAR.—Deep blood red and the largest and best of the reds.

352. NIAGARA.—Delicate cream-yellow splashed with rosy carmine in throat. Very large.

353. MRS. FRANK PENDLETON.—Lovely salmon pink with brilliant deep, red blotches in the throat. One of the finest Gladioli.

354. PRINCEPS.—Rich dazzling scarlet marked with white on the lower portion which intensifies the brilliancy of the scarlet.

355. SET OF THE ABOVE SIX GLADIOLI, 50c.

356. OUR SUPERB MIXED GLADIOLI

Our Mixed Gladioli are made up from splendid named sorts, brightest and most varied colors, white, yellow, pink, rose, blush, intense scarlet, carmine, violet. Each 8c; 60c per dozen.

Tuberoses

346. One of the most delightfully fragrant and beautiful of the summer-flowering bulbs. By skilful management a succession of flowers may be obtained all the year round. Each 10c; $1.00 per dozen.

Lillies

347. LILIUM AURATUM (Gold Banded Japan Lily).—The largest and most beautiful of all the Japanese lilies. The flower is ivory white, with a central bank of bright yellow and numerous deep purple spots. Price 50c each.

Caladium

357. ELEPHANT’S EAR.—Very effective and a fast grower. Tropical-like foliage. 25c each.

Novelty

358. PHYSALIS FRANCHETI OR CHINESE LANTERN PLANT.

An interesting perennial of rapid growth, producing small white flowers, followed by green lantern-like pods which in autumn turn to a brilliant red. These pods average 2 to 3 inches in diameter; they become dry and retain their size, shape and color a long time. A few stalks of Lantern Plant placed in an empty vase makes a beautiful bouquet, which will last all through the winter months. Price 25c each.

Dasheens

349. BELGIAN.—Beautiful soft flesh pink, orchid-like in coloring. The most popular of all Gladioli.

350. PEACE.—Immense pure white flowers with a touch of carmine in lower petals. Excellent.

351. WAR.—Deep blood red and the largest and best of the reds.

352. NIAGARA.—Delicate cream-yellow splashed with rosy carmine in throat. Very large.

353. MRS. FRANK PENDLETON.—Lovely salmon pink with brilliant deep, red blotches in the throat. One of the finest Gladioli.

354. PRINCEPS.—Rich dazzling scarlet marked with white on the lower portion which intensifies the brilliancy of the scarlet.

355. SET OF THE ABOVE SIX GLADIOLI, 50c.

356. OUR SUPERB MIXED GLADIOLI

Our Mixed Gladioli are made up from splendid named sorts, brightest and most varied colors, white, yellow, pink, rose, blush, intense scarlet, carmine, violet. Each 8c; 60c per dozen.

Tuberoses

346. One of the most delightfully fragrant and beautiful of the summer-flowering bulbs. By skilful management a succession of flowers may be obtained all the year round. Each 10c; $1.00 per dozen.

Lillies

347. LILIUM AURATUM (Gold Banded Japan Lily).—The largest and most beautiful of all the Japanese lilies. The flower is ivory white, with a central bank of bright yellow and numerous deep purple spots. Price 50c each.

Caladium

357. ELEPHANT’S EAR.—Very effective and a fast grower. Tropical-like foliage. 25c each.

Novelty

358. PHYSALIS FRANCHETI OR CHINESE LANTERN PLANT.

An interesting perennial of rapid growth, producing small white flowers, followed by green lantern-like pods which in autumn turn to a brilliant red. These pods average 2 to 3 inches in diameter; they become dry and retain their size, shape and color a long time. A few stalks of Lantern Plant placed in an empty vase makes a beautiful bouquet, which will last all through the winter months. Price 25c each.

Dasheens

348. BELL—The same family as the Elephant Ear, and resemble them somewhat, but grow more upright. Price 20c each; 3 for 50c, postpaid.

Dahlias

The splendid qualities and gorgeous beauty of the present-day Dahlia have won for it a place at the head of the most important garden plants. None are easier to grow, respond more freely to care and attention, or flower more freely. Few cultivated plants have a wider range of color. Plant about May 1st in a moderately rich soil, covering the tubers three inches deep.

345. MIXED DAHLIAS.—Excellent assortment, 6 for 75c; 12 for $1.40.

Hardy Chrysanthemums

Chrysanthemums are very easy of culture, and the plants last for years. Plants 20c each; $2.00 per dozen.

330. CHRYSOLOR.—A very fine yellow, medium to tall in growth. Early bloomer.

331. OCTOBER FROST.—Pure white, excellent form. One of the earliest to bloom.

333. INTENSITY.—The most one wonderful red sort. Vigorous grower with fine stem and foliage. Color bright crimson.

334. HELEN FRICK.—Color beautiful clear pink, slightly deeper shade at center. A superb sort.

335.—Set of Five hardy “Mums” above, 75c.
Beautiful Perennial Plants

Everblooming Butterfly Bush
359. This is one of the most valuable and beautiful new plants introduced for years. It was recently discovered in Western China, and thrives in all parts of the United States. It is a hardy perennial, blooming practically all summer, and blooms the first summer from small plants, continuing even after frost. Its hardiness, ease of growth, beautiful color, and piquant fragrance makes it popular everywhere. It is fine as a specimen plant, as a hedge, or as a background, but should not be planted in sod or extreme shade. It gets its name from the fact that it is very attractive to butterflies, and they come from everywhere to feed on its nectar. One-year plants 50c; 2-year 75c.

Hollyhocks
360. These are known and loved everywhere, and no old-fashioned garden is complete without them. They were favorites in our grandmother's garden. Be particular not to get them in front of your other flowers, as they grow so tall they would hide them. Five to 7 feet high 10c each; $1.00 per dozen.

Japan Iris
361. The flowers are of enormous size, averaging eight to ten inches across, charming hues and colors, the prevailing colors being white, crimson, rose, lilac, lavender, violet and blue. The Japan Iris is perfectly hardy and flowers in great profusion in July and August. Each 45c; $1.00 per dozen.

Perennial Phlox
362. Instead of the small, dull-hued flowers of olden times we now have immense trusses, all bright and showy, the individual flowers three times the size of the old varieties, and the colors ranging from the purest white to violet. With Perennial Phlox a show of brilliant flowers can be had from June until November. Perfectly hardy. Choice shades of red, white and pink. Each 25c; $2.00 per dozen.

Foxglove
363. The Foxgloves are quite stately and highly ornamental plants when well grown, with flower stems at least three feet in height. They are fine for the mixed border, or planted singly in half-shady places near a walk or drive. The racemes of flowers are often two feet in length, containing scores of the prettily spotted thimble-shaped flowers. Perfectly hardy. Mixed varieties, 50c each.

Peonies
364. Peonies, especially the modern introductions, are probably the most valuable, and most beloved of all perennial plants. Planted in sun or semi-shade, in single clumps or long beds, or bordering lawns, shrub rows, and carriage drives they give a grand display of large, fragrant blossoms of brilliant colors during June, followed by their exquisite foliage, which is very ornamental during summer months. They are also most effective for home and table decorations, and last longer in water than many other perennials. Avoid buying cheap peonies. They require just as much care as the better kinds, and are disappointing in the end. We grow only varieties that we have thoroughly tested at our trial grounds, and here offer the grandest peonies in commerce.

Planting.—Peonies may be planted in spring as soon as the frost is out of the ground. Orders should be sent in at once, so that we can forward when weather permits. Avoid planting too deeply, as this is often the cause of shy blooming; 2 or 3 inches of soil over the crown (eyes), being sufficient. After planting give a hearty mulching of rotten stable manure and do not transplant the clumps for at least five years, and then only if very necessary. Pink, red and white. Price 50c each.

ORDER EARLY

The Peony is One of our Prettiest Perennial Flowers
Crimson Rambler

It would be impossible to exaggerate the beauty of the rose. The very name suggests beauty and fragrance. It is the flower we love the best and deserves all the affection and care we bestow upon it. It also suggests a beauty in the world which is now a possibility, even with but a small garden. Our list comprises reliable, hardy varieties, producing a large range of colors, which will bloom from spring till November. It is a question of careful selection and we will gladly assist you.

Price of 1 Doz. each: $6.00. 10 Doz. each: $5.50. One Doz. each: $6.00 per doz.

227. CAROLINE TESTOUT (The Oregon Rose).—A large rose, especially adapted for table decoration. Deep pink in color, beautiful buds.

228. FRAU KARL DRUSCHKI.—Pure white; large long buds, perfectly able. It is the best white Hybrid Perpetual known and one of the best novelties of recent years. Will grow wherever other roses can be grown.

230. GENERAL JACQUEMINOT.—Bright crimson; large but not full, although very effective; hardy and fragrant. Famous the world over.

233. KILLARNEY.—Noted for its freedom of bloom and the large size of its intensely fragrant flowers. Buds are large, long and pointed. Color flesh, shaded white suffused pale pink.

234. LA FRANCE.—Probably the best known rose in cultivation. Both flowers and buds are of beautiful form and large size; very sweet; color delicate silvery rose, changing to silvery pink. Starts to bloom when small and continues until stopped by frost.

236. MME. FRANCISCA KRUGER.—Deep shade of copper-yellow flowers which bloom continuously. Excellent for bedding and massing.

238. MRS. JOHN LANGLE.—Very free-flowering, commencing to bloom early in the season, and continuing until autumn. Color a soft delicate pink, with a satiny finish; very fragrant.

242. MME. GABRIEL LUIZET.—Very distinct pink, large, cup-shaped; fragrant. It has no rival as an exhibition rose.

245. MARSHALL P. WILDER.—Cherry crimson, large size. Good form, very fragrant, perpetual bloomer, vigorous grower; very valuable.

247. MRS. TESTOUT.—Deep red rose; splendid foliage and habit, with larger flowers than any other variety. Free bloomer.

248. SALET (MOSS).—Bright rosy red; a vigorous grower; abundant bloomer, seldom surpassed; pretty in bud.

249. ULRICH BRUNNER.—Bright cherry-red; very attractive; flowers of fine form carried well upon the plant; petals of great substance: plant hardy, vigorous and resistant mildew.

Climbing Roses

Price of Climbing Roses, 75c each: $6.00 per dozen.

252. CRIMSON RAMBLER.—This is undoubtedly the most popular of all roses. It is hardy, wonderfully free-flowering, rich glowing crimson, intensely bright and vivid in color. The plant is a strong rampant grower, making shoots 10 to 12 feet long after the first year. The flowers are produced in great trusses; pyramidal in shape, often 25 to 30 in a cluster, fairly covering the plant from the ground to the top with a mass of bright glowing crimson. This is the most wonderful rose introduced in the past thirty years.

253. DOROTHY PERKINS.—An extremely vigorous and hardy rose of the rambling type; a good companion for Climbing Rambler. It is shell pink in color, very free-flowering and entirely reliable. The plants are even harder than Climbing Rambler.

254. WHITE DOROTHY PERKINS.—Same as the pink Dorothy, except in color, which is white.

255. YELLOW RAMBLER (GOLDFINCH).—Light canary shade; clusters smaller, individual flowers larger than Crimson.

257. CLIMBING AMERICAN BEAUTY.—The latest triumph in American rose growing—the true climbing American Beauty in all its promise and glory. The same as American Beauty practically. Larger flowers, each produced on separate stems, vivid rosy-crimson in color, with delicious fragrance.
SET OF ONE EACH OF THE
ABOVE FOUR ROSES
STURDY FIELD GROWN PLANTS
$1.50 POSTPAID

229-A. PINK RADIANCE.—A bright, cheerful and even shade of pink. A very fine rose.

231-A. ETOILE DE LYON.—Rich golden yellow. One of the most beautiful yellow roses.

229. GRUSS AN TEPLITZ.—Beautiful crimson red, wonderfully free-flowering. One of the finest for outside show.

231. KAISERIN AUGUSTA VICTORIA.—Pure white, shading to lemon. Flowers large, fine formed, borne singly on strong, upright stems; continues beautiful even when fully expanded. The fragrance is distinct from other varieties, being a combination of tea and magnolia. Free-flowering and vigorous, with glossy foliage.
Real Tested Vegetable Seeds

Fresh vegetables right from your own back yard garden are a great treat, being fresh they are much better than you can buy. As a matter of economy raising your own vegetables has no equal.

Your Success! That's the height of our ambition, and we will go to extremes to make all transactions satisfactory; but you know that there are many causes why good seeds do not always make good crops, owing to weather, heat, cold, insects and other reasons beyond the control of planter and seedsman. We, therefore, cannot guarantee the crop nor give any warranty, express or implied, as to their growth, description, quality or productiveness; and we will not be in any way responsible for the crop. If the purchaser does not accept the goods on these terms they are at once to be returned in the original, unbroken package, and the purchase price will be refunded.

We want you to plant our dependable, tested seeds this year and know that you will be highly pleased with the results. May we have your order?

MRS. HERGET, BUFFALO, N. Y. SAYS:

"Your seed grew just wonderful. Everyone admired my garden and vegetables. The best success I ever had with seed."

How We Test Our Seeds for Germination

We keep a record of every test and keep these tests up to date so we can feel assured that a good number of the seeds we sent you will sprout and grow sturdy plants in your soil.

Corner of Our Seed-Testing Laboratory

These Photographs Were Taken From Our Own Seed Tests.

Wherever a fresh supply of seeds is brought into the house, we get a certain number of seeds from each variety and put them in our modern germinator. Then we see that the seeds receive about the same temperature and moisture they would have if planted in the ground.

Just How We Take Care to Safeguard Your Results With Our Seeds.

In a few days the seeds begin to put on sprouts and we can tell just how many seeds will be productive.

We then count the percentage of seeds that germinate before sending them out to you.

Asparagus

For your convenience order by variety number. It is easy to order.

Culture.—As early in the spring as the soil will work up in good shape, sow seeds thinly in drills one foot apart. When the seedlings are two to four inches tall, thin them out to stand 2 or 3 inches apart in the row. Keep the rows free from weeds by frequent cultivation. The following spring prepare your permanent bed by applying plenty of well-rotted manure and some coarse salt which should be worked into the soil. Set your plants in shallow trenches, 6 inches apart in the row and do not cut the first year. Those who want asparagus more quickly should set out 2-year-old plants, obtainable from us.

400. BARR'S MAMMOTH.—The stalks are very large, sometimes an inch in diameter, yet retain their thickness completely up to the top and have long heads. They are quick growing, tender and of excellent quality. Pkt., 5c; oz., 15c; ½ lb., 40c; postpaid.

401. COLOMBIAN MAMMOTH WHITE.—This excellent variety furnishes shoots of exceptionally large size and of superior tenderness and flavor. Color pure white until 4 or 6 inches above the surface. Pkt., 5c; oz., 15c; ½ lb., 40c; postpaid.

402. PALMETTO.—A very early maturing and prolific variety, producing an abundance of early, large, deep green shoots of best quality. Pkt., 5c; oz., 15c; ½ lb., 40c; postpaid.

Planting Guide Free with $2.00 order for seeds.

We pay postage on packets, ounces, quarter pounds, and pounds on all seeds marked postpaid. On larger quantities purchaser pays the transportation charges.
**Beans**

**TESTED BEANS—DWARF OR BUSH**

Culture.—Beans are tender, and should not be planted until all danger from frost is past. No time is gained by planting them before the ground becomes warm. Drop the beans two to three inches apart, in rows standing eighteen inches or two feet apart; cultivate only when dry; draw the soil slightly toward them. They will make green beans in six to eight weeks; sow every two weeks for a succession, if seasonable, up to September.

Please write for prices in larger quantities than quoted below.

402. **BLACK VALENTINE.**—A great improvement over the old standard early Red Valentine, being one-third longer, with pods perfectly round and straight and of excellent quality. It also has the additional advantage of being both early and late planting and is extremely hardy. It will withstand early and late frost, an excellent shipper, large yielder, and of very handsome appearance. **Pkt., 10c; lb., 30c; 10 lbs., $2.50; postpaid.**

**Pole Lima Beans**

Lima beans are not only profitable as green shell beans, but are also a paying crop to sell as dried beans during the winter.

They can be sown and bring good prices.

Lima beans will not grow until the weather and ground are warm; if planted earlier the seeds are apt to rot in the ground.

412. **EARLY LARGE WHITE LIMA.**—Productive, large, flat pods, rich and of finest flavor. The dry beans are white. **Pkt., 10c; lb., 30c; 10 lbs., $2.50; postpaid.**

414. **KING OF THE GARDEN LIMA.**—The old standard market and family sort. Vine begins to produce pods at the foot of the pole and the bearing season continues until frost. Pods large, and well filled with beans of mammoth size. **Pkt., 10c; lb., 30c; 10 lbs., $2.50; postpaid.**

**Bush Lima Beans**

415. **BURPEE'S BUSH LIMA.**—The bush form of the Large White Lima. The bush is about 20 inches high and up to two and a half feet in diameter bearing from 50 to 80 large pods. **Pkt., 10c; lb., 35c; 10 lbs., $3.00; postpaid.**

416. **HENDERSON BUSH LIMA.**—Valuable on account of extreme earliness. Extremely productive, tender and delicious. The dry beans are small and white. **Pkt., 10c; lb., 20c; 10 lbs., $2.50; postpaid.**

Order $2.00 worth of seeds and get our Planting Guide free.

Write for prices in quantity on Beans.

**Pole Beans**

Pole Beans are even more sensitive to cold and wet than the Dwarf varieties, and should be sown two weeks later. After settled warm weather, set poles four to eight feet long in rows four feet apart and extending north and south, the poles being three feet apart in the row. Around each stake plant five to eight beans two inches deep.

One pound will plant 100 hills.

410. **KENTUCKY WONDER.**—Vine vigorous, climbing well and very productive, bearing its pods in large clusters; pods green, very long, often reaching nine or ten inches; near round when young and very crisp. Best pole bean for markets and market. **Pkt., 10c; lb., 30c; 10 lbs., $2.50; postpaid.**

411. **WHITE CORNFIELD.**—Extremely early, very productive; pods are borne in clusters of from four to six, broad, thick, solidly fleshy and stringless. **Pkt., 10c; lb., 30c; 10 lbs., $2.50; postpaid.**

412. **WHITE CREESBACK.**—Extremely early, very productive. Pods are borne in clusters from 4 to 6 broad which are solid, fleshy and stringless. Well adapted for shipping to distant markets. **Seed white.** **Pkt., 10c; lb., 30c; 10 lbs., $2.50; postpaid.**

**Burpee’s Bush Lima Beans**

**Pole Lima Beans**

Lima beans are not only profitable as green shell beans, but are also a paying crop to sell as dried beans during the winter.

They can be sown and bring good prices.

Lima beans will not grow until the weather and ground are warm; if planted earlier the seeds are apt to rot in the ground.

412. **EARLY LARGE WHITE LIMA.**—Productive, large, flat pods, rich and of finest flavor. The dry beans are white. **Pkt., 10c; lb., 30c; 10 lbs., $2.50; postpaid.**

414. **KING OF THE GARDEN LIMA.**—The old standard market and family sort. Vine begins to produce pods at the foot of the pole and the bearing season continues until frost. Pods large, and well filled with beans of mammoth size. **Pkt., 10c; lb., 30c; 10 lbs., $2.50; postpaid.**

**Bush Lima Beans**

415. **BURPEE'S BUSH LIMA.**—The bush form of the Large White Lima. The bush is about 20 inches high and up to two and a half feet in diameter bearing from 50 to 80 large pods. **Pkt., 10c; lb., 35c; 10 lbs., $3.00; postpaid.**

416. **HENDERSON BUSH LIMA.**—Valuable on account of extreme earliness. Extremely productive, tender and delicious. The dry beans are small and white. **Pkt., 10c; lb., 20c; 10 lbs., $2.50; postpaid.**

Order $2.00 worth of seeds and get our Planting Guide free.

Beets

Table

Culture.—Sow as soon as the land will permit, and for a general crop about the middle of April; sow the drills 15 inches apart and thin out to four inches; for winter use, sow the turnip varieties about July.

416A. DETROIT DARK RED.—A splendid deep red turnip beet, with small upright tops, early maturing, and makes nice round finely-shaped roots. One of the finest for early market or home use. Pkt., 5c; oz., 10c; ¼-lb., 25c; lb., 75c; postpaid.

417. EARLY BLOOD TURNIP.—Here we have the old standby, the turnip beet, with its dark red color, well known to so many homesteads. Pkt., 5c; oz., 10c; ¼-lb., 25c; lb., 75c; postpaid.

418. ECLIPSE.—An extra early variety, with round, smooth blood-red roots. Matures very early and is popular both for feeding market garden. Pkt., 5c; oz., 10c; ¼-lb., 25c; lb., 75c; postpaid.

419. EGYPTIAN EARLY DARK RED.—A very early, dark blood-red, medium size, tender and sweet; fine for kitchen garden. Pkt., 5c; oz., 10c; ¼-lb., 25c; lb., 75c; postpaid.

420. LONG SMOOTH BLOOD RED.—With fully developed roots average 10 inches long by 3½ inches in diameter at the top. They are almost parsnip-shaped, have firm, sweet, very dark flesh and make ideal pickles. Pkt., 5c; oz., 10c; ¼-lb., 25c; lb., 75c; postpaid.

421. SWISS CHARD or Spinach Beet.—Grown exclusively for the numerous fleshy tender leaves and leaf stalks. The mid-rib is cooked and served like asparagus, the leaves the same as spinach. The plants sometimes grow to a height of two feet. SwissChard should have a prominent place in all gardens. Valuable for greens for chickens by cutting the stem and the leaf. Pkt., 5c; oz., 10c; ¼-lb., 25c; lb., 75c; postpaid.

Brussels Sprouts

424. PERFECTION.—This is the best variety for the south, grows almost two feet high and produces from the stem numerous little sprouts, one to two inches in diameter, resembling cabbage. Pkt., 5c; oz., 10c; ¼-lb., 25c; lb., 75c; postpaid.

Mangels or Stock Beets

Great Stock Feed

Mangels or Stock Beets are a splendid winter feed for cattle and hogs. Increases the milk yield from cows. Puts animals in better physical condition. Yield larger crops than turnips and are of greater feeding value. The best root food in existence for all kinds of livestock. Over forty tons have been grown on a single acre.

No more profitable crop can be grown for stock and hog feed. Every farmer should plant one or two acres every year. No other acre on the farm would return better dividends. Under favorable conditions 40 tons per acre can be grown, and in feeding value this is equal to 130 bushels of corn.

Mangels are grown for stock in a healthy condition, besides affording a variety of feed.

All stock raisers and farmers should investigate the great food value of Mangels. Try them and be convinced.

Culture.—Much depends on good culture, so prepare your land thoroughly and plow deeply. Sow from about the middle of March until the middle of June, and give thorough cultivation. After the first cultivation, thin out, so as to stand six inches apart in the row, and cultivate like corn. If late in planting soak the seeds for 24 hours before planting. Do not begin feeding Mangels until after January 1st. Sow six pounds to the acre in rows 2½ feet apart.

422. LONG RED.—The largest of all Mangels and the heaviest cropper. The roots grow about ¼ out of the ground and frequently measure two or more feet in length by six inches in diameter. An excellent keeper, nutritious and milk producing. Pkt., 5c; oz., 10c; ¼-lb., 20c; lb., 50c; postpaid.

423. WHITE FRENCH SUGAR.—A strain of beets very desirable for stock feeding, affording not only a very large crop, but exceedingly rich in sugar and other nutritive elements, and is a much better beet for stock feeding than the small sugar beet. The roots average ten to twelve inches, and the outline is that of a broad, thick wedge. The upper portion is of a soft, bright pink, shading lighter toward the bottom, where the lower portion for about one-third the length is white. Pkt., 5c; oz., 10c; ¼-lb., 20c; lb., 50c; postpaid.

Our $1.00 Bargain Collection of seed on back cover is made up of our very best seed in full-sized packets. It's a real bargain.

Plant enough to supply your table wants in season and to can for winter use. A dollar saved is a dollar earned.
Arkansas Seed and Nursery Company, Fayetteville, Arkansas

Cabbage

Culture.—Good drainage, plenty of manure on rich, heavy loam, and frequent cultivation are essential to success in cabbage-growing. For the early sorts sow the seeds in the fall and when the plants are a month old, transplant to cold-frames, setting them down to the first leaves. Sow also in January and February and thin out to 2 to 3 feet apart in the rows, according to variety planted. For late variety, sow from the middle to the last of spring and transplant when 4 to 6 inches high.

Best Varieties

Early Jersey Wakefield Cabbage

425. ALL SEASONS.—One of the best of its class. Ready for the market only a few days later than the Early Summer and larger. The heads are firm, solid, and of good flavor. Pkt., 5c; oz., 20c; 1/4 lb., 65c; lb., $2.00; postpaid.

426. CHARLESTON OR LARGEST.—Splendid strain of Jersey Wakefield, about a week later, with heads twice as large, weighing from 8 to 12 pounds each and more, and not so pointed as the original Charleston Wakefield; is a good keeper and may be planted as a second crop, to mature in autumn, if desired. Much used by market gardeners to follow Jersey Wakefield, as it rates shipper, and in great favor with everybody who knows it. Pkt., 5c; oz., 20c; 1/4 lb., 65c; lb., $2.00; postpaid.

427. COPENHAGEN.—Large heads nearly round or slightly flattened, very hard and heavy. The growth is compact, there being few outside leaves, so the plants may be set close together. Copenhagen Market heads as soon as Jersey Wakefield cabbages. The most remarkable point about this cabbage is its uniformity—every plant under normal conditions will produce a good, solid head, and every head is as like another as two peas in a pod. The heads mature all at the same time so the crop can be cleaned up within a short time after the first heads mature. A very profitable cabbage to grow for market and an excellent early variety for the home garden. Pkt., 5c; oz., 20c; 1/4 lb., 75c; lb., $2.50; postpaid.

428. DANISH BALLHEAD or HOLLANDER.—Heaviest cabbage for its size we have ever grown; exceedingly solid, hard; handsome; very hardy, a sure header, a good seller and one of the finest keepers, making it particularly desirable for shipping long distances. Our stock is grown by the most careful and experienced grower in Denmark, where the finest Ballhead Cabbage in the world is grown. Ours is the true short-stemmed Ballhead. Pkt., 5c; oz., 20c; 1/4 lb., 75c; lb., $2.50; postpaid.

Early Dwarf Flat Dutch Cabbage

429. EARLY DWARF FLAT DUTCH.—Has succeeded admirably on account of its ability to resist heat. Never flays under the severest sun and produces very fine heads after the earliest sorts have disappeared. We recommend it highly. Pkt., 5c; oz., 20c; 1/4 lb., 65c; lb., $2.00; postpaid.

430. EARLY JERSEY WAKEFIELD.—Market gardeners can find nothing better for an early cabbage. Heads somewhat pointed, extremely solid, of superior quality. Pkt., 5c; oz., 20c; 1/4 lb., 65c; lb., $2.00; postpaid.

431. LARGE LATE DRUMHEAD.—A standard fall shipping sort. Makes a large, round, firm head, uniform in shape and color or rots. With good cultivation heads attain a weight of 20 to 30 pounds, and are of the finest quality. Sureness in heading and regularity in growth has made this one of the most popular sorts for winter keeping. The quality, either for slicing, for kraut and for general table use is unsurpassed. Pkt., 5c; oz., 20c; 1/4 lb., 65c; lb., $2.00; postpaid.

432. DRUMHEAD SAVOY.—Best and largest heading of the Savoy Cabbage. Few people seem to know the delicious flavor of Savoy Cabbage. Far superior to the flat-leaved sorts, and as tender as cauliflower, after frost. Should be in every garden. Pkt., 5c; oz., 25c; 1/4 lb., 75c; postpaid.

433. LATE Flat DUTCH.—Grows to large size; flat, solid heads; a sure header, good keeper and shipper. Pkt., 5c; oz., 20c; 1/4 lb., 65c; lb., $2.00; postpaid.

434. MAMMOTH RED ROCK.—Largest and surest heading red cabbage. Plants are large with numerous spreading leaves. Head is large, round, very solid, and of a deep red color. Ninety-eight per cent of the plants will form extra fine heads. Pkt., 5c; oz., 25c; 1/4 lb., 75c; lb., $2.50; postpaid.

Pe-Tsai

435. CHINESE OR CELERY CABBAGE.—A new vegetable from China that is attracting much attention. By detaching the large outer leaves it blanches like celery. As a salad it rivals the finest lettuce, or cooked like cabbage or spinach, it makes splendid greens. For main crop sow the seed last of August, and transplant a foot apart when large enough. Pkt., 5c; oz., 25c; 1/4 lb., 85c; postpaid.

ORDER NOW PLANT EARLY

Collard

436. FROST-PROOF CABBAGE PLANTS.—Really true-to-name frost proof plants. Grown by men specializing in plants of highest character. The varieties we offer are Early Jersey Wakefield, and Early Flat Dutch. Per 100, 40c; per 1,000, $3.00; postpaid.

Drumhead Savoy Cabbage

437. TRUE GEORGIA.—Grows from 4 to 5 feet high, and forms a very large, loose head. Leaves are tinged with purple. Pkt., 5c; oz., 10c; 1/4 lb., 30c; lb., $1.00.

Large Late Drumhead Cabbage
Carrots

Culture.—For early crops sow in spring, as soon as ground can be worked, in drills 15 inches apart; cover seed one-half inch; thin plants to three or four inches in rows.

438. DANVERS' HALF LONG.—A rich orange red variety, very smooth and handsome. An excellent market variety. The most desirable main crop variety. Good keeper. 
Pkt., 5c; oz., 10c; 1/2 lb., 25c; lb., $1.00; postpaid.

439. GUERANDE, or OXHEART.—A good variety on soils too hard and stiff for the longer-growing sorts. Root is short, very thick, and has a small tap-root; flesh bright orange color, fine grained and sweet flavor. 
Pkt., 5c; oz., 10c; 1/2 lb., 35c; lb., $1.00; postpaid.

440. LONG ORANGE.—Best late variety for general field culture. It keeps very well, and is therefore excellently adapted for winter use. 
Pkt., 5c; oz., 10c; 1/2 lb., 35c; lb., $1.00; postpaid.

Celery

Celery seed is slow to germinate and ample time must be given. Sow thinly, cover lightly and keep constantly moist. Count on about 7,500 plants per ounce, or 1/2 pound per acre. When the seedling plants are 3 inches high, clip for stocky growth, or else transplant.

444. GOLDEN SELF-BLANCHING, or PARIS GOLDEN.—The best market variety, especially for early crop. The plant is naturally golden yellow (both stem and leaves), but needs to be blanched to make it brittle and fit for table; rather small bunch. French grown. 
Pkt., 10c; 1/2 oz., 50c; oz., 85c; postpaid.

445. WHITE PLUME.—A comparatively easy variety to grow, as it is fairly hardy, and being naturally white, is easy to blanch. The leaves are also white, tinted with green at tips. Forms a medium size bunch, fairly tall; early. 
Pkt., 10c; oz., 25c; postpaid.

446.—Produces a tuber somewhat like a turnip and top like celery. It is largely grown for the purpose of flavoring soups. 
Pkt., 10c; oz., 25c; 1/2 lb., 85c; postpaid.

Celeriac

Culture.—Plant in hills 3 feet apart; leave 2 or 3 plants to the hill where ground is strong.

447. COUNTRY GENTLEMAN, or SHOE-PEG.—A well-known medium-early sort. 

448. EARLY ADAMS.—While not a sweet corn is usually classed with them. The ears are well filled. It can be planted earlier than sweet corn. The stalks grow about 6 feet high on good land, bearing 2 or 3 medium size ears of white grains of excellent quality. A very popular roasting ear corn. 
Pkt., 10c; lb., 20c; 10 lbs., $1.50; postpaid.

449. GOLDEN BANTAM.—A very early sweet corn with golden-yellow grains. Generally considered the sweetest and tenderest variety in existence. Probably more extensively grown than any other early variety. 
Pkt., 10c; lb., 25c; 10 lbs., $1.75; postpaid.

450. MAMMOTH WHITE CORY.—One of the largest and best extra early sweet corns. Each stalk furnishes two or more large, fine-shaped ears. The ears are twelve-rowed, very symmetrical and handsome. The grain is large, broad, very white and of remarkably good quality for such an early sort. 
Pkt., 10c; lb., 20c; 10 lbs., $1.50; postpaid.
Muskmelons—Cantaloupes

Culture.—The soil for Cantaloupes must be light, rich and sandy for if grown on a heavy soil the quality will be poor and they will not be so early. When danger of frost is over drop 8 or 10 seeds in a hill, 6 feet apart each way, covering about 1 inch deep. As soon as they commence to run thin out to 3 or 4 best plants in a hill and cultivate until the vines cover the ground. The seed can also be planted in drills, and when plants are large enough thin out to about 2 feet in the row. If slow to fruit, pinch off the ends of the growing shoots. The best way to prepare the ground for cantaloupes is to list the rows 6 feet apart opening up a furrow and putting barnyard manure in the furrow then cover up. This should be done at least 30 days before the seed is planted so as to give the manure time to rot in the ground.

**490. SALMON-TINTED 10-25 POLLOCK.**—Beautiful salmon color netted and ribbed; oval in shape. Most delicious flavor and elegant slipper. Small seed cavity and flesh solid and crispy. Does exceedingly well on most soils but reaches its best on light sandy loams. Pkt., 5c; oz., 10c; ½ lb., 35c; lb., $1.25.

**491. GENUINE ROCKY FORD.**—A sweet, luscious melon that has grown world famous. The Rocky Ford has proven to be the most valuable cantaloupe. The vines are exceedingly healthy and vigorous, bearing an enormous quantity of fruits during the entire season. The color of the skin is of a rich greenish-gold; the netting is prominent and light in color; appearance very attractive. The flesh is very deep, ripening clear to the rind, very solid, yet thoroughly melting and it has an exceedingly small seed cavity. It is very sweet and luscious. Pkt., 5c; oz., 15c; ½ lb., 35c; lb., $1.25.

**492. LARGE HACKENSACK.**—Very large, green-fleshed melon. Vines hardy, vigorous and productive. Fruits nearly round, usually somewhat flattened; ribs large and of irregular width, densely covered with coarse netting. Flesh green.

**HONEY DEW MELON 494.**—The delicious honey-like flavor of this new melon has created a sensation wherever used. Of good size, weighing 6 to 8 pounds; light cream-colored, smooth skin with thick, rich and sweet flesh of light green color. The rind is thin but tough and so close that the rich flesh is practically sealed up where it keeps in finest condition for several months after it is ripe. Pkt., 5c; oz., 15c; ½ lb., 40c; lb., $1.50; postpaid.

Watermelons

**NEW CROP—PURE SEED**

**Tom Watson**

Culture.—Plant in hills 8 or 10 feet apart, dropping ten seeds to the hill; thin out to three plants to the hill; cultivate until the vines cover the ground, and pinch the ends of the early shoots to induce early fruiting.

**497. CITRON.**—Grows uniformly round and smooth, striped and marbled with light green, flesh white and solid, seed red. This variety is not used for eating in the raw state, but for preserves, pickles, etc. Pkt., 5c; oz., 10c; ½ lb., 35c; lb., $1.00; postpaid.

**498. GEORGIA RATTLESNAKE.**—The fruits are long light green in color, with mottled stripes of a darker shade. The flesh dark red, Very tender and sweet. Pkt., 5c; oz., 10c; ½ lb., 25c; lb., 80c.

**499. HALBERT'S HONEY.**—One of the finest melons for the home garden, of superb luscious quality; medium large, oval; dark glossy green; flesh bright crimson. Very tender and sweet. Pkt., 5c; oz., 10c; ½ lb., 25c; lb., 80c; postpaid.

**500. IMPROVED KLECKLY SWEETS.**—Special strain of this grand market gardener's melon. Large, oblong, 26 inches in length by 10 to 12 inches in diameter, dark green, flesh bright scarlet, rind only about half an inch thick. Extremely sweet. Pkt., 5c; oz., 10c; ½ lb., 25c; lb., 80c; postpaid.

**501. IRISH GRAY.**—This melon is large, the rind a mottled greenish-gray. The flesh red, crisp, free from stringiness and as sweet as honey. A little earlier than Tom Watson. Pkt., 5c; oz., 10c; ½ lb., 25c; lb., 80c; postpaid.

**502. TOM WATSON.**—The finest all-purpose melon. The average size 24 to 28 inches long and 12 to 14 inches in diameter. It has a dark mottled green rind, thin, but tough enough to stand shipping long distances. The seed we offer is of the very best strain. Pkt., 5c; oz., 10c; ½ lb., 25c; lb., 80c; postpaid.
Cucumbers

Culture.—Cucumbers should not be planted until the ground gets warm, unless you are prepared to protect them during the cold storms. Plant in hills 6 feet apart each way, enrich the hills with a quantity of decomposed manure or packing house fertilizer; scatter 10 or 15 seeds on each hill, cover one inch deep and press the soil firmly over them. Thin out to three or four plants to the hill; never allow any of the fruits to ripen on the vine, as they will cease setting fruit as soon as seed commences to mature.

452. THE DAVIS PERFECT.—An excellent variety both for outdoor and forcing purposes; unequalled for shape, quality, color and productiveness. Pkt., 5c; oz., 15c; ¼ lb., 40c; lb., $1.25; postpaid.

453. EARLY CLUSTER.—Vine vigorous, producing the bulk of the crop near the root and in clusters. Fruit short, with uniformly thick end, dark green, but paler at blossom end. A very productive sort. Pkt., 5c; oz., 15c; ¼ lb., 40c; lb., $1.25; postpaid.

454. EXTRA LONG GREEN.—Very productive; fruits quite long, averaging 10 to 12 inches in length. Very popular both as a slicer and for pickles. One of the best general purpose cucumbers. Pkt., 5c; oz., 15c; ¼ lb., 40c; lb., $1.25; postpaid.

455. IMPROVED EARLY WHITE SPINE.—Valuable for the home garden as well as for early market. Under favorable conditions the fruits reach a length of 7 inches. They are borne early and in good numbers. Of uniform shape, almost cylindrical and fairly well covered with small white spines. Pkt., 5c; oz., 15c; ¼ lb., 40c; lb., $1.25; postpaid.

456. JAPANESE CLIMBING.—This is a strong vigorous variety, good for pickling. Pkt., 5c; oz., 20c; ¼ lb., 50c; lb., $1.50; postpaid.

457. SHORT GREEN PICKLING.—Known as Early Frame, and is an excellent sort, both for table use and for pickling. Comes into condition for use little later than Early Cluster. Pkt., 5c; oz., 15c; ¼ lb., 40c; lb., $1.25; postpaid.

Write for prices in larger quantities.

475. *THYME.—For seasoning. 10c
476. *WORMWOOD.—Beneficial for poultry. 10c

Kale

477. SIBERIAN.—Popular boiling-greens for fall, winter, and spring. Very popular in the South. Quite hardy and deserves more general cultivation in the North. Pkt., 5c; oz., 10c; ¼ lb., 40c; lb., $1.00; postpaid.

478. EARLY WHITE VIENNA.—Also called "Turnip-Rooted Cabbage." Forms large turnip-like bulbs on the stem above the ground. Should be used while young and tender, when they are sweet and nutritious. Culture same as for early cabbage. Very much sweeter than turnips. Pkt., 5c; oz., 20c; ¼ lb., 60c; postpaid.

Herbs

Varieties marked with an * are perennials.

461. ANISE.—Used for seasoning and gar-Pkt. 10c
462. *BALM.—Leaves used medicinally. 10c
463. BASIL, SWEET. 10c
464. BORAGE.—Leaves are used as a salad. 10c
465. CARAWAY.—Seeds used medicinally and in bread. 10c
466. CORIANDER.—Seeds used for flavoring. 10c
467. DILL.—Leaves used with pickles, seeds for flavoring soups and vinegar. 10c
468. FENNEL, SWEET.—Seeds for flavoring; leaves for garnishing. 10c
469. *HOREHOUND.—Has medicinal qualities. 10c
470. *LAVENDER.—Its flowers are used in the manufacture of oil and distilled water. 10c
471. *MARJORAM, SWEET.—Used for seasoning soups and pickles. 10c
472. ROSEMARY.—Used for seasoning. 10c
473. SAGE.—Leaves used for stuffing and seasoning. 10c
474. SAVORY, SUMMER.—Used for seasoning. 10c

Endive

MAMMOTH GREEN CURLED.—A beautiful and valuable variety. Superior to any other. Grows 15 to 20 inches in diameter. Leaves are very crisp, juicy and full. Extremely hardy, equally suitable for summer or autumn planting. Pkt., 5c; oz., 15c; ¼ lb., 40c; lb., $1.25; postpaid.

Egg Plant

Culture.—The seed should be planted in a hotbed or box in the house, care being taken that the plants have an even, continuous heat. They do not respond to the outdoor climate. Set out gradually, giving the plant only vigorous plants when the weather is warm.

458. BLACK BEAUTY.—The best early market variety. Also the best for home use. Fully ten days earlier than the New York Improved, very attractive in appearance and entirely spineless. The fruits set freely and develop quickly, so that the entire crop can be gathered before frost. Pkt., 10c; oz., 60c; ¼ lb., $2.00; postpaid.

459. NEW YORK IMPROVED SPINELESS.—Our selected strain of this popular sort has no superior. The most beautiful, as well as edible, of the many varieties of egg plant. A well grown specimen never fails to take the premium at the fair. Absolutely spineless. Pkt., 10c; oz., 60c; ¼ lb., $2.00; postpaid.

Kohlrabi

479. BLACK BEAUTY EGG PLANT. 10c
480. KOHLRABI. 10c
Lettuce

Culture.—Lettuce thrives best in light, very rich, moist soil, but does well in common garden soil enriched with rotten manure. For first crop sow in gentle heat in February, and transplant to ten inches apart. May be sown thickly and cut when plants are very young. For a summer supply sow thinly in shallow drills in a cool, partially shaded place, in rich soil, and thin to a foot apart.

480. BIG BOSTON.—One of the most popular of the old standard varieties; desirable for forcing. Especially valuable for early outdoor planting or for late fall planting as it will endure cold weather conditions better than any other variety. Large compact heads of light green leaves, tender and crisp. Pkt., 5c; oz., 10c; 1/4 lb., 35c; lb., $1.25; postpaid.

481. BLACK SEEDED SIMPSON.—A superior variety; large, light colored heads. Pkt., 5c; oz., 10c; 1/4 lb., 35c; lb., $1.25; postpaid.

482. CALIFORNIA CREAM BUTTER.—A reliable heading variety. The heads are a rich, creamy yellow inside and of a tender buttery flavor. Outside leaves green, spotted brown. Medium early and withstands the summer heat. Pkt., 5c; oz., 10c; 1/4 lb., 35c; lb., $1.25; postpaid.

483. EARLY CURLY SIMPSON.—Early; forms a compact mass of tender leaves of a yellowish green color. Pkt., 5c; oz., 10c; 1/4 lb., 35c; lb., $1.25; postpaid.

484. IMPROVED HANSON.—In table quality the Hanson is perfection itself, being free from bitter taste. Forms immense, tender, crisp heads that remain long in good table condition. The outer leaves are large and broad, blistered and crumpled with frilled edges. Probably more largely grown than any other variety. Pkt., 5c; oz., 10c; 1/4 lb., 35c; lb., $1.25; postpaid.

485. MAY KING.—Of quick growth and produces large, handsome heads with few outside leaves. Color light green, outer leaves folding closely, producing round, solid heads 6 to 7 inches in diameter. Splendid for market gardeners or private use. Pkt., 5c; oz., 10c; 1/4 lb., 35c; lb., $1.25; postpaid.

486. PRIZE HEAD.—Plant large, deep green, so washed with red as to appear more red than green, forming a head of a dense mass of leaves rather than one like a cabbage. Pkt., 5c; oz., 10c; 1/4 lb., 35c; lb., $1.25; postpaid.

Big Boston

486-A. GRAND RAPIDS.—Especially adapted for greenhouse culture, being the best variety of its kind for this use. Can also be grown outdoors early in the spring or late fall. Makes a large compact bunch of curled and fringed leaves. Grows very fast and keeps for a long time after being cut. Pkt., 5c; oz., 10c; 1-5 lb., 40c; 1 lb., $1.50.

487. PARIS WHITE COS, ROMAINE OR CELERY LETTUCE.—Has no equal for quality. Forms long, conical heads, which, if tied up, blend pure white and make solid heads as crisp as celery stalks. Pkt., 5c; oz., 10c; 1/4 lb., 35c; lb., $1.25; postpaid.

Leek

479. BROAD LONDON FLAG.—Belongs to the onion family, but does not form bulbs. The long thick neck of the plant is blanched in the fall and used same as young onions, having a sweet onion-like flavor. Popular in the South, but little known in the North. Pkt., 5c; oz., 10c; 1/4 lb., 60c.

Okra or Gumbo

Culture.—When the ground has become warm, sow thickly in drills 2 feet apart, and when large enough, thin out to 8 inches apart in the rows. Two months for most rapid growth, and three weeks after the 1st of August for the 2nd planting. The best variety and the only one that produces a large, solid, and numerous seed pod. Pkt., 5c; oz., 10c; 1/4 lb., 35c; lb., 65c; postpaid.

507. WHITE VELVET.—Plant of medium height, bearing a large crop of white, smooth pods, which retain their tenderness until nearly full sized. Pkt., 5c; oz., 10c; 1/4 lb., 25c; lb., 65c; postpaid.

Corn Salad

507-A. For spring salad or garnishing, a good substitute for lettuce or spinach. Does not do well in hot weather. Should be planted early as possible in spring. Ounce plants 30 feet in row. Pkt., 5c; oz., 15c; 1-1 lb., 50c.

Ozark Lawn Grass Seed

488.—This mixture is far better than straight Blue Grass. It is made up mostly of Blue Grass and White Clover and some other grasses that will grow rapidly and make a fine showing immediately. The coarse grasses will protect the Blue Grass until it gets well established.

The Kentucky Blue Grass and White Clover will eventually drive out the other grasses and make a fine lawn. This mixture is as good as we can make it and we have had a number of years experience with grass seeds. Full directions for making and care of lawn on each package. Sow one pound to 150 square feet. Put up in neat colored cartons and in bulk.

1-lb. Carton, postpaid ........................................ 50c
In bulk, 1 lb.................................................. 45c
In bulk, 10 lbs................................................ 1$4.25
Onions

Culture.—Onions are raised in two ways, from seed and from sets. Seed sown in early spring produces ripe onions in the fall, while sets planted at the same time make green “bunching” onions in a few weeks and dry ripens quickly. Sets may be put out in the fall and will produce green onions much earlier than when set out in the spring. To raise good onions from seed, the land must be rich and in fine condition. Sow at seed as early as possible in rows 14 inches apart. Weed as soon as the onions appear and keep well cultivated all through the season. Seed may also be sown in a hotbed or greenhouse in February or March and the onions transplanted to the open ground when large enough. The finest onions are raised in this way.

Bermuda Onions

Bermuda onions are largely grown in the South and have been there a most profitable investment. They are planted there in the fall and shipped North in May and are the earliest large new onions on the market. Growers do equally well with them in the North. They are the quickest growing onions known; sown at the same time as Silver Skin they will produce fully grown bulbs, about 3 inches in diameter, when the others are only 1 inch large. The seed we offer is genuine Teneriffe grown.

514. WHITE BERMUDA.—The bulbs are quite broad and flat in form. The color is not a clear white but rather a pale straw; flesh crisp, solid and mild. Early ripening. Pkt., 10c; oz., 25c; ½ lb., 75c.

515. RED BERMUDA.—Similar in form and early ripening to the Bermuda. White but grow larger in size, ranging from 3 to 4 inches in diameter. Very flat and of a light pink color. The flesh is white, slightly suffused with pink; very mild. Pkt., 10c; oz., 25c; ½ lb., 75c.

516. CRYSTAL WHITE WAX.—This new variety is a large, pure white flat onion. The earliest and most popular onion with the large growers in the South. Produces the mildest and sweetest onions of them all. Very fine for slicing, the color being so clear and pure. Pkt., 10c; oz., 30c; ½ lb., 1.00.

517. BERMUDA ONION PLANTS.—The Bermuda Onion has made Texas famous. Train loads of this superior onion have been shipped from Texas every year. Planted extensively in the South for home use and for market and brings the highest price on all markets. Can be grown successfully wherever sets are grown. By setting out our plants early you will have sets you can use in the fall and at lower cost than from sets. The plants make much better onions as the sets have to rot before making into onions requiring much longer time to mature and are not so large after spending its strength in rotting. The plants we are offering are the Crystal White Bermuda, the sweetest of all Bermuda varieties. 100, 35c; 200 up to 1,000, 30c per 100; per 1,000, $2.50; postpaid.

Mustard

Culture.—Mustard is grown for its seed which is used for flavoring or medicinal purposes or grown for its leaf, which is used in salad or cooked like spinach. Sow mustard as soon as the soil can be worked, and every three weeks for a succession, or in the south it may be sown in the fall. Cover the seed lightly in twelve to eighteen inch drills. Cut the leaf when not over four inches high and expect this cutting in fifty days from the seedings.

ORDER EARLY

503. LARGE SMOOTH LEAVED.—Has a large, fleshy leaf. The flavor is mild and it is quite slow in sending up its seed stalk, remaining a long time fit for table use. Pkt., 5c; oz., 10c; ¼ lb., 25c; lb., 75c; postpaid.

504. SOUTHERN GIANT CURLED.—Highly esteemed for salads, particularly in the south. Leaves are twice the size of the ordinary white mustard: flavor sweet and pungent. Pkt., 5c; oz., 10c; ¼ lb., 25c; lb., 75c; postpaid.

505. WHITE MUSTARD.—The leaves are rather small and have onions quick enough, but on account of other mustards, of light yellow color and are used in pickling for family use. The seed of this variety is used in making "ground mustard." Pkt., 5c; oz., 10c; ¼ lb., 25c; lb., 75c; postpaid.
Pumpkins

One ounce seed will plant 20 hills. One pound will plant 1 acre.

520. KENTUCKY FIELD.—Large round, flattened, hardy and productive. One to two feet in diameter. It has thick flesh of extra fine quality and is a splendid sort for canning, family and market use, and is used largely for stock feeding. Pkt., 5c; oz., 10c; ½ lb., 25c; lb., 75c; postpaid.

521. LARGE CHEESE.—Best for canning; has heavy, thick, sweet meat; large round flattened variety, with creamy-buff skin. An excellent keeper and very productive quality. Excellent for stock feeding. Pkt., 5c; oz., 10c; ½ lb., 25c; lb., 75c; postpaid.

522. SMALL SUGAR OR PIE.—A handsome prolific variety; fruits of small size, averaging about ten inches in diameter, of excellent keeping qualities, flattened and slightly ribbed. Skin deep orange, yellow flesh, fine grained and sweet. Pkt., 5c; oz., 15c; ½ lb., 40c; lb., $1.00.

Parsnips

A most profitable variety mild and sweet. Pkt., 10c; oz., 50c; ½ lb., $1.50; postpaid.

533. SWEET BELL, or BULLNOSE.—A very large pepper of square shape, mild, thick and hard. Suitable for stuffing and for mixing pickles. Less pungent than other sorts, and notwithstanding its size, one of the earliest. Pkt., 10c; oz., 50c; ½ lb., $1.50; postpaid.

534. PIMENTO PEPPER.—This is a sweet pepper—that is the difference—one which you will enjoy eating in salad, either fresh or canned. Can- ners and market gardeners are planting Pimento largely. Very thick flesh, wonderful mild flavor. Pkt., 10c; oz., 50c; ½ lb., $1.50. Postpaid.

535. GIANT.—A large pepper, the flesh very thick, of a rich red color, very tender, delicious, perfectly mild. Pkt., 10c; oz., 50c; ½ lb., $1.50; postpaid.

536. AMERICAN WONDER.—A very large pepper, with stripes of red and green, very tender, delicious, perfectly mild. Pkt., 10c; oz., 50c; ½ lb., $1.50; postpaid.

537. FIRST OF ALL.—A reliable early cropper of the hardy smooth seed and variety. Not quite the same as the Alaska, but quite hardy. Pkt., 10c; lb., $2.00; postpaid.

538. NOTT’S EXCELSIOR.—A dwarf variety and a good one. The vines are more vigorous than American Wonder, growing 12 to 15 inches in height; a very desirable as a second planting. Pkt., 10c; lb., 50c; 10 lbs., $2.50.

Peas—Garden

Culture.—Sow in early spring and make successive plantings every ten days until July 1. In the latter part of August sow early peas for an autumn crop. Drill 1 to 2 inches deep in rows 2½ to 4 feet apart. In the field use no sticks. In garden culture sow in double rows 10 inches apart, and use small sticks for the tall growing varieties. Pkt., 10c; oz., 50c; ½ lb., $1.50. Postpaid.

525. EXTRA EARLY ALASKA.—Of remarkable earliness and hardiness. A good yielder and produces pods of good size and dark green color, which are well filled with round smooth peas of splendid flavor. Pkt., 10c; lb., 25c; 10 lbs., $2.00; postpaid.

526. AMERICAN WONDER.—Vigorous, producing vines, with a luxuriant foliage, and producing the leaves on one side of the stalk, growing from nine to twelve inches high. On account of its dwarf habit of growth it is very desirable for private garden use. Pods are light colored, straight, and about two and one-half inches long and blunt at the end. Fit for picking fifty-five days from planting. Seed is wrinkled, green, medium in size and square at the ends. Pkt., 10c; oz., 50c; ½ lb., $1.50. Postpaid.

527. WHITE MARROWFAT.—Grows 4 to 5 feet in height. Pods large, round, light green and well filled. Excellent for summer crop. Pkt., 10c; lb., 25c; 10 lbs., $2.00; postpaid. Write for prices in larger quantities.

529. TELEPHONE.—A vigorous grower; extra large, well filled pods. Pkt., 10c; oz., 30c; 10 lbs., $2.50; postpaid.

530. BALSAM.—Grows 2 to 3 feet in height. Pods large, round, light green and well filled. Excellent for summer crop. Pkt., 10c; lb., 25c; 10 lbs., $2.00; postpaid. Write for prices in larger quantities.
Vegetable Plants

If you do not have a hotbed, or if you are too busy in the spring to sow seed, to grow cabbage, tomatoes, egg plants, etc., we can furnish you with all your vegetable plants, as we are growing millions of these plants in our own hotbeds.

SWEET POTATO PLANTS

Grow your own sweet potatoes for the finest eating there is. They are becoming very popular as a standard crop, and no home should be without them. Send us your order early, telling us when you want your order shipped, and we will ship them as soon as conditions will allow. They are generally ready from April 10th to May 1st, and can be planted till the last of June. These plants are shipped separate from seed or nursery order, and they remain dormant or in planting condition a long time after they are shipped.

500 plants will make a nice home garden. Plant
8,000 to the acre. They weigh about 15 pounds per 1,000, packed for shipment.

Radishes

Culture.—The soil for radishes should be light, rich and well pulverized, as their mild and crisp flavor is much affected by the quality of their home. For very early use, sow in mild hotbeds in January, and in open ground as soon as the ground can be worked; for succession, sow at intervals of ten or twelve days; they also do well sown in the fall.

535. CHINA ROSE WINTER.—Distinct, handsome variety of winter radish; skin deep rose color, flesh pure white, solid, of fine flavor; good keeper well into spring. (Very large size and shape roots.) Ready for use in about 40 days. Pkt., 5c; oz., 10c; ½ lb., 25c; lb., 55c.

536. CRIMSON GIANT.—A large-sized extra early turnip radish. Grows quickly, and even when it attains large size remains tender and of fine flavor to the last. A money-maker for the market gardener. Its bright crimson color makes it a seller on first sight. Pkt., 5c; oz., 10c; ½ lb., 25c; lb., 55c; postpaid.

537. EARLY SCARLET TURNIP.—A small, round, red, turnip-shaped radish with a small top and of quick growth. An early variety of rich color, crisp and tender. Pkt., 5c; oz., 10c; ½ lb., 25c; lb., 55c; postpaid.

538. EARLY SCARLET TURNIP, WHITE TIP.—A most popular and attractive variety, a great favorite in many large markets. The radish is bright scarlet, with white top and of a beautiful shape; flesh white, crisp and finely flavored. Pkt., 5c; oz., 10c; ½ lb., 25c; lb., 55c; postpaid.

539. EARLY WHITE TURNIP.—Very handsome; of quick growth; sweet, juicy and tender; skin ivory white, flesh pure white. Pkt., 5c; oz., 10c; ½ lb., 25c; lb., 55c; postpaid.

540. FRENCH BREAKFAST.—A fine forcing Radish, maturing in twenty days from germination;

Crimson Giant Radishes

Early Scarlet Turnip Radishes
Tomatoes

Culture.—For early crops sow in January and February in pots or place near a window or in spent mild hotbeds; keep well watered: when plants are three inches high transplant into another frame, to remain until ready for planting out. This makes them strong and stocky. If you wish the first fruits that set to ripen quickly, pinch off the tops of vine and later fruit shoots; all vining varieties ought to be staked and tied up.

552. DWARF CHAMPION.—A purplish-pink variety, forming a strong, erect, bushy plant. Often sold as a tree tomato. Fruit smooth, medium sized, solid and good flavor. Desirable for forcing, as it can be planted close to the grass and more closely on the bench than the tall-growing kinds.

555. LIVINGSTON'S BEAUTY (Color Purple).—One of the oldest and still very popular in the great shipping centers for reason of its being always exceptionally smooth and uniform in size. One of the best main crop sorts. Pkt., 5¢; oz., 25¢; ½ lb., 75¢; lb., $2.50; postpaid.

556. PONDEROSA.—The fruit ripens early and bears well until very late; very solid, almost seedless: of good sub-acid flavor and of immense size, frequently weighing considerably more than two pounds. Somewhat scattered on the vine, and a small percentage are rather rough. Our strain, however, is now producing a much smoother fruit than when first introduced. Good tomato for home use; splendid slicer. Pkt., 10¢; oz., 35¢; ½ lb., $1.00; postpaid.

557. SPARKS' EARLIANA.—One of the earliest, medium size, of purplish-pink color, very prolific, fruits forming almost in clusters. Very handsome in shape, quite solid, and of fine quality. Very popular in the early market. Pkt., 5¢; oz., 25¢; ½ lb., 75¢; postpaid.

Pondoroza

Mrs. Herget, Buffalo, N.

PLANT EARLY—ORDER NOW

Squashes

Culture.—Squashes require a warm, fertile soil of sandy nature for best growth. Summer squashes grow mostly in compact bush form; hills for these should be about 4 feet apart; for long, trailing fall and winter varieties hills should be 8 to 12 feet apart each way. If ground is not very rich, two or three shovelfuls of well-rotted manure should be worked into each hill. Put 8 to 10 seeds in each hill, about one inch deep. When danger from bugs is over, thin from 3 to 4 of the strongest plants.

551. DELICIOUS.—A squash of exceptional merit for table use. A fall and winter variety. The fruit varies in shape and size, weight from 5 to 10 pounds each. Rind very thin, uniformly green; flesh very thick and dark orange color. Pkt., 10¢; oz., 25¢; ½ lb., 60¢; lb., $1.20; postpaid.

Our big 32-page complete Planting Guide Free with seed order amounting to $2.00.

Yellow Summer Crookneck Squash

549. LIGHT WHITE BUSH, or PATTY PAN.—The best early variety. Plants are of true bush form and produce fruit early in the season. Largely grown in the South for shipment to Northern markets. Pkt., 5¢; oz., 15¢; ¼ lb., 50¢; lb., $1.50.

550. YELLOW SUMMER CROOKNECK.—Plants are very productive and early-bearing; skin of fruit is thickly warted and of orange-yellow color. Pkt., 5¢; oz., 15¢; ¼ lb., 50¢; lb., $1.10; postpaid.
Turnips

High Germinating Seed

Early Flat White Dutch Turnip

Culture.—For summer use sow early in spring in light, rich or new soil, in drills 1 3/4 to 2 feet apart according to size of the variety and cover one-half inch deep, or sow broadcast, but in either case be sure to have the ground rich and freshly stirred. Thin early and keep free from weeds so that the young plants will not be checked in growth. Any overcrowding will result in rough and poorly flavored roots. It is important to get the spring and summer crop started early so that the turnips may have time to grow to sufficient size before hot weather causes them to become tough and bitter.

560. EXTRA EARLY WHITE MILAN. The earliest turnip. Tops very small, distinctly strap-leaved, and growing very erect and compact. Bulbs form earliest of any sort. The clean, white roots are smooth, flat, symmetrical and handsome in appearance. Each is white, tender and sweet. Pkt., 5c; oz., 15c; 1/4 lb., 40c; lb., $1.25; postpaid.

561. EARLY FLAT WHITE DUTCH.—A quick-growing, medium-sized root for early spring or fall planting. Skin and flesh are both pure white, the latter being quite tender and sweet. Is flat with a fine tapering root; the leaf is strap-shaped. For home use there is no turnip that we would rather recommend. Pkt., 5c; oz., 10c; 1/2 lb., 20c; lb., 60c; postpaid.

562. LARGE YELLOW, or AMBLER GLOBE.—A popular, yellow-fleshed, sweet-flavored turnip that produces a good crop and will keep in perfect condition until spring. It is globe-shaped and size averages large. It is highly esteemed by housewives for table use and popular for stock feeding. Pkt., 5c; oz., 10c; 1/4 lb., 20c; lb., 60c.

563. PURPLE TOP STRAP-LEAVED.—Most widely cultivated and best known variety. Used largely for sowning broadcast among corn and potatoes. It is round and flat, white on the bottom and reddish-purple above ground, and a very quick grower. Fine table variety. Pkt., 5c; oz., 10c; 1/2 lb., 20c; lb., 60c; postpaid.

564. PURPLE TOP WHITE GLOBE.—Of a perfect globe shape, almost six inches in diameter with smooth, white skin; flesh pure white, firm and crisp, and of quick growth. A good keeper and is fine for seed. Pkt., 5c; oz., 10c; 1/2 lb., 20c; lb., 60c; postpaid.

Rhubarb or Pie Plant

Culture.—Sow the seed in cold frame in the spring and as soon as the plants are large enough transplant into rows 6 feet apart each way, and each spring work into the soil a liberal supply of decomposed stable manure. One ounce of seed will sow 75 feet of row.

545.—Rhubarb is vigorous and productive. The leaf stalks are very numerous, the longer ones being from 15 to 20 inches in length, and fully 1 3/4 inches wide. The whole plant is nearly 5 1/2 feet in diameter, while the leaves, exclusive of the flower stalks, are about 2 1/2 feet in height. Rhubarb is very highly esteemed for use in pies, tarts, jelly and marmalade, and large quantities are sold in all markets every year. It is the first vegetable of the season and no garden should be without it. Pkt., 5c; oz., 20c; 1/4 lb., 60c; postpaid.

Rhubarb Roots.—Rhubarb roots are set out and cultivated as the above, and this method gives edible rhubarb in a very short time.

Salsify or Vegetable Oyster

A delicious vegetable for winter use. Should not be used before frost and is improved by remaining in the ground during freezing weather. Sow in shallow rows 18 inches apart early in the spring and let it grow all summer. One ounce of seed to 100 feet of drill.

546. MAMMOTH SANDWICH ISLAND.—The best white variety. Large and strong growing, with long, smooth, white, tapering roots and less liable to branch than any other kind. Pkt., 5c; oz., 20c; 1/4 lb., 60c.

Spinach

Cultivated very extensively for "greens." A profitable crop for market. Select a rich well-drained soil, highly manured. For a succession sow early in April and again in May in drills 1 foot apart and 1 inch deep, properly thinning out when the plants are an inch in the leaf. For early spring use sow early in autumn and protect the plants with a light covering of leaves or straw.

547. BLOOMSDALE (SAVoy).—Earliest and best of all. The leaves are numerous, curled and wrinkled. Pkt., 5c; oz., 10c; 1/4 lb., 20c; lb., 50c; postpaid.

WRITE FOR SPECIAL PRICES IN LARGER QUANTITIES.
High Germinating Field Seeds
To Give You Every Advantage

We do not quote prices in quantity on any field seeds because the market fluctuates and if we had to make prices at time our catalog goes to press we would have to make them high enough to cover any possible advance. So that we may give you every advantage please write us for prices when you are ready to buy and we will quote lowest possible prices for top quality seed.

800. Red Clover
This clover has long been considered the most important of the clover family. It is valuable as a hay and pasture crop and is beneficial to the soil. Grain crops will yield more when they follow clover. It will enrich worn out soil provided the soil is not too much exhausted before the clover is sown. To get the best hay it should be cut when just past the blooming stage. The selection of seed is of greatest importance. The seed we are offering was grown on limestone soil and is the purest seed we can get and 1923 crop. Samples on request. Sow 8 to 10 lbs. to acre. Price, lb. 36c; 10 lbs., $3.00; postpaid.

801. Baby Rice.—Small ears and small grains which pop to a fair size. The popped corn is deliciously tender and will bring a premium in the market. Pkt., 5c; lb., 20c.

804. Red Rust-Proof.—One of the heaviest yielding of the spring varieties. Not inclined to rust. The standard oats of this section. Matures about the middle of June. Sow 1¼ to 2 bu. to acre. $1.00 per bu.; not postpaid.

805. Early May.—Very early maturing. Grows well on thin land, making a good, smooth straw for early feed. These oats are the best to plant. The seed we offer is grown in Washington County, Ark., where these oats grow to perfection. Sow about 2 bu. to acre. $1.00 per bu.; not postpaid.

806. Alfalfa or Lucerne
Too well known to require any detailed description. There is no other plant in existence that is so well known and so useful. It is perennial and lasts from eight to ten years. (The roots penetrate from 10 to 15 feet in the ground. Hard pan or limestone underground is fatal to the plant. Sandy loam with porous underground, so the roots can get to water is preferable.) Seed can be sown either in fall or spring, at the rate of 15 to 20 pounds per acre. Price, lb., 36c; 10 lbs., $3.00; postpaid.

Our field seed has all been carefully selected and tested for purity and high germination. Good seed is the foundation of every good profitable crop and we, having several farms of our own, appreciate this fact and feel that our customer's success is either made or falls on our seed and exert every effort and spare no expense to give you good pure seeds—sure to germinate.
FIELD OF SWEET CLOVER

A two-ton crop of clover when plowed under will supply more nitrogen to the soil than twenty tons of fresh straw-made manure or twelve tons of ordinary barnyard manure.

Vetch

Vetch is another splendid variety of forage plant and is rapidly gaining popular favor with farmers and stock raisers throughout the country. It is very hardy, is valuable as a winter cover crop to prevent leaching and for forage and fertilizing purposes. It is an annual but resows itself and will come up year after year on the same ground. It grows well on nearly all soils and thrives surprisingly on poor, light land, and will endure extremes of drought, heat and cold. It improves the soil, being a great nitrogen gatherer, the roots bearing innumerable nodules of nitrogen gathering bacteria. These take the nitrogen from the air and restore it to the soil where it is so much needed. It is related to the pea family, but the vines are much longer and the foliage more abundant.

808. HAIRY, or WINTER VETCH.—May be sown either in spring or fall. For fall planting should be sown in August or September; it will cover the ground before frost and make a valuable winter forage crop. When sown in April or May it is ready to cut by July; the second growth will make excellent pasture for late summer and fall use. Sow 20 to 30 pounds of Vetch with same amount of oats, using the oats for supporting the vetch. 30c lb.; 10 lbs., $2.75; postpaid.

Grasses

KENTUCKY BLUE GRASS

810. No other grass will prove as valuable for establishing a permanent pasture as Kentucky Blue Grass. Blue grass is excellent to plant in lawns on account it will grow under shade trees and will make an even stand all over the lawn. This grass can be planted any time in the fall or winter and it will come out in the early spring. 40c lb.; 10 lbs., $3.50; postpaid.

TIMOTHY

813. As a crop to cut for hay, Timothy is probably surpassed by no other grass now cultivated. If sown alone it requires 12 to 18 pounds per acre. It is usually sown with other grasses about one-half to one-third of the above amount. Can be sown in either fall or spring. Per lb., 20c; 10 lbs., $1.50; postpaid. Write for prices in larger quantities.

You are certainly dependable business people of your word and we appreciate it. You may be assured of our future business. Remaining thankfully yours,
Mrs. Paul Schultz, Kansas.
811. Sudan Grass

A sweet, heavy-yielding grass; absolutely drought-proof and grows successfully everywhere sorghums will grow. Livestock of all kinds eat it greedily and for a stock of cattle it will add weight more rapidly than any other variety of sorghum grasses. Yields more pasture per acre than any other annual forage crop.

Sudan is absolutely free from the objectionable root system which makes Johnson Grass so difficult to eradicate. Sudan Grass is an annual and requires reseeding each year. It is more difficult to get rid of than sorghum, cowpeas or other similar crops, and it may be sown, either drilled in cultivated rows 3 1/2 feet apart, or broadcast. For drilling rows 3 1/2 feet apart it will require 3 to 6 pounds per acre, depending on the cultivation of the land. Broadcast it should be sown 15 or 20 pounds per acre. The seed should not be sown until the ground is warm in the spring; in this latitude about May 10th is the earliest practical date. The first hay crop will be ready to harvest about 45 to 50 days from date of sowing. The second crop from 30 to 35 days. The third crop from 30 to 35 days. If you wish to save a seed crop from Sudan it will require 40 to 50 days from sowing the seed until the seed crop is to be harvested. After threshing, the straw will prove as nutritious as any other variety of sorghum. Sudan may be sown as far north as any other variety of the sorghum family. In many states it is going to supersede millet as a forage crop because it produces so much more tonnage per acre and the quality of the foliages is so much better. Lb., 15c; 10 lbs., $1.25; postpaid.

812. Bermuda Grass

Very fine for binding loose and dry soils. The habits of this grass is to set roots at each joint that touches the ground, thereby forming a complete sod. Furnishes excellent pasture. It is decidedly a summer grass, as it does not start off until ground is thoroughly warm in the spring, and turns to a buff color after killing frost in the fall. We believe this grass will help solve the pasture question during the hot dry summer months. Best time to sow Bermuda is about the last of February or any time during March. But will not germinate until the ground gets warm. Sow on top of snow or just before a rain if possible. Also valuable in some sections as a lawn grass. Sow 3 to 5 pounds to the acre. Per lb., 50c.; 10 lbs., $1.60; postpaid.

813. Orchard Grass

Adapted to middle U. S., especially what is known as the Ozark section. Wherever it has been given a fair trial it has been placed in the front rank of grasses for permanent pasture. It is a range deep root perennial and it does not form true sod as it grows in bunches. It starts very early in the spring and keeps on growing during the summer months. It resists drought better than Timothy and blue grass and grows well in the shade. You may plant orchard grass any time during the fall or winter and would recommend sowing on top of snow if the ground is well prepared. 25c lb.; 10 lbs., $2.00; postpaid.

814. Red Top or Herd's Grass

Fancy Solid Seed.

This is well adapted to the Southwest. Suitable for meadow and pasture mixture, or for use in lawn making. Adapts itself to any soil, but produces best results on moist, rich soils, where it grows to 2 to 2 1/2 feet high. Often sown with Timothy and Clover, and outlasts both. Sow 20 to 25 pounds per acre for lawns. For pastures, 8 to 10 pounds per acre. 30c lb.; 10 lbs., $2.75; postpaid.

815. Cow Peas

Made poor land rich, and rich land more productive. Cow Peas are especially valuable as a "catch crop" for forage or hay and there are many million acres of land in the Middle West that could be improved in productivity by sowing Cow Peas after wheat has been harvested. Cow Peas require from 70 to 90 days to mature a crop of peas, and if the crop is put in the last of June or the first half of July there will be plenty of time for the wheat crop to mature as well as to produce a good hay crop. The same land can be used for seeding wheat again in the fall months.

816. Whippoorwill.—A favorite early-maturing variety of medium growth. The seed is reddish brown speckled. Per lb., 15c; 10 lbs., $1.25; postpaid.

818. Milo Maize

Yellow Milo Maize produces large quantities of good green fodder, stooks from the ground sending out shoots from the joints. Stalks grow about 10 feet and the seed is an excellent feed for poultry and stock. It should be planted and harvested like Kafir Corn as it is of the same family. 10 c lb.; 10 lbs., 75c; postpaid.

Our 32-page Planting Guide free with $2.00 order for seeds.
Dwarf Essex Rape

Where there are hogs there should also be Dwarf Essex Rape. Under favorable circumstances, Dwarf Essex Rape is ready for pasture in six weeks from time of sowing. One acre of good rape will carry a dozen pigs for two months. One of the experiment stations found that an acre of Rape produced as much gain on pigs when used for pasture crop along with grain as 86 bushels of corn would produce. In addition to the feeding value of Rape, the hogs are bound to be stronger and gain more rapidly on the Rape pasture than the ones which have been fed on grain alone. A plant with as great feeding value as Rape should find a welcome on all farms where hogs are raised. An acre of Rape in the experiment equaled much more than an average acre of corn and the cost of producing was much less, and the cost of harvesting was nothing, as it was done by the hogs. Also fine for chickens and turkeys. **Per lb., 20c; 10 lbs., $1.75; postpaid.**

Golden Millet

Formerly called German Millet. (Sorghum haleoides.) The Southern grown Millet is true golden and much superior to western or the ordinary so-called Millet. Try some of both and compare results. This is the Millet that has enormous big heads and wide leaves. It is the rankest of all Millets and makes lots of feed either as hay or grain. Can be sown as late as July in this latitude, and on that account is valuable where other crops have been washed out and lost. **Per lb., 15c; 10 lbs., $1.25.**

Mung Beans

The greatest forage crop of the present. As compared to the Soy Bean the stalk is more tender for stock to eat, puts more nitrogen in the soil and will take only one-fourth as much seed to plant an acre. Four pounds plants one acre. Can be planted in rows 3 to 4 feet apart. The beans make the finest chicken feed, and the stalks are the finest chicken fuel, doubling the yield of cow peas to the acre. One of the greatest drought resisters known. Can be planted on any kind of land. If you want to improve your land, plant MUNG BEANS. **Lb., 50c; postpaid.**

824-A

Sorghum or Cane for Forage

**822. TENNESSEE RED.** This is the best of all varieties adapted to sandy soil. Grows very successfully in most of all the Southern states. Pods are long and have 3 to 5 large kernels in them. We are offering a pure strain of this seed. **Lb., 25c.**

**823. BLACK AMBER.** One of the most valuable for ensilage, and is practically sourless when stacked out of ear, and usually can be fed as late as the middle of May following the harvest without deterioration in any respect. We can also recommend it for forage. **Lb., 15c; 10 lbs., $1.25.**

**824. EIGHT-PART RANE.**— Later than the Amber, the stalks shorter and heavier. For forage or ensilage it is first class. One of the heaviest producers of ensilage of the entire Sorghum family. **Lb., 15c; 10 lbs., $1.25.**

**824-A.**

Sunflower

**825. MAMMOTH RUSSIAN.**—The largest of all Sunflowers. One of the best paying crops that can be raised for chicken feed. Seeds are the finest food for poultry and is much cheaper to raise than corn. It also affords protection against malaria. Plant as you would corn, and about the same amount. **Per lb., 20c; 10 lbs., $1.50.**

Soja or Soy Beans

This valuable forage and fertilizing plant is similar to clover in its habits of growth, pods filled with nutritious beans, relished by all kinds of stock. For pasturing or feeding as green fodder it is very valuable, and nearly equal to clover for fertilizing. Because of its erect habit of growth, they are far easier to harvest and cure than the Cow-peas. A larger crop may be secured by planting and cultivating like corn, cutting with a corn binder and curing in shocks. **Lb., 15c; 10 lbs., $1.25; postpaid.**

Spanish Peanuts

Dwarf Essex Rape

Buckwheat Giant Japanese

So good as late as July and make a bumper yield. Every farmer should have at least 5 acres. Sow ½ bushel per acre. Average yield, 30 to 40 bushels. Big money-maker. One of the best plants for bees to feed on. **12c lb.; 10 lbs., $1.00.**

Kaffir Corn (White)

Largely grown in the South, and now coming into favor with Northern farmers. It grows 5 or 6 feet high, with a straight upright growth and numerous broad leaves. It makes the best kind of fodder for cattle or horses, and is easily grown. The seed is splendid for poultry. Sow in rows 2½ to 3½ feet apart and cultivate the same as corn, but do not sow until the ground is thoroughly dry. Five to ten pounds will seed an acre if sown in rows, or one-half bushel broadcast. **Per lb., 10c; 10 lbs., 75c.**

The Spanish Peanut

Have been the most popular variety used in the Middle West and Southwest. Best root is the acreage devoted to peanuts has been devoted to hog feed and hay. It is the largest producer in pounds per acre, but on account of the small size pods, it costs a little more to harvest than with the larger podded varieties. The nuts are always very sweet and finely flavored; are more free from undeveloped kernels than any other variety. **Per lb., 15c; 10 lbs., $1.25.**

821.

817.
Selected Tested Seed Corn

Prices on Seed Corn are NOT PREPAID

Every corn grower knows that seed corn "wears out" and consequently buys the best seed corn he can buy. We cannot understand why so much inferior corn is planted—good seed corn only costs a few cents more per acre and the increase in the crop pays the extra cost many, many times. Plant our carefully selected and tested seed corn.

St. Charles White

827. ST. CHARLES WHITE.—Known throughout the South as a standard large red cob corn. A big yielder and especially adapted to bottom land. The stalks are tall and large-growing, bearing from 1 to 2 large ears—12 to 14 inches long. It has been known to yield as high as $5 bushels to the acre. The seed we offer you this year was grown on our own farms in 1923 along the White River in Washington County, Arkansas, where this variety of corn grows to perfection. 120 days. Pk., 90c; bu., $3.00.

829. STRAWBERRY.—A good reliable variety, extra large ear. Grains red and white striped; withstands drought excellently and a heavy yielder. We grew a pure strain of this variety on our seed farms in 1923 and can offer a very high grade of seed. 120 days. Pk., $1.00; bu., $2.75.

Iowa Silver Mine

829. IOWA SILVER MINE.—Ninety-Day corn. Stalks grow to a height of 7 to 8 feet and set the ears about 3¼ feet or more from the ground. It has not a large growth of fodder, having three broad leaves for grain, though it has plenty of blades to support the growth and is as well rooted as any corn grown. The ears measure from 10 to 12 inches in length and weigh over 1⅓ pounds. They are uniform in size and shape with 16 to 20 rows of deep, pure white kernels on small white cob. It is ready for market earlier than any white corn grown. Seventy pounds of this corn in the ear will make 62 pounds shelled. 90 to 100 days. Pk., 90c; bu., $3.00.

830. HICKORY KING.—An entirely distinct variety of white corn, combining the largest grain with the smallest cob. A single grain will completely cover the cob of an ear broken in half. A great yielder, giving more shelled corn to the acre bulk of ears than any other variety. It is satisfied with any kind of soil and will produce good strong stalks bearing two and occasionally three good ears. A good drought resister. We recommend it very highly. 90 to 100 days. Pk., 90c; bu., $3.75.

831. REID'S YELLOW DENT.—Thoroughbred, pedigreed, carefully selected stock. During the past 5 or 6 years this variety has come rapidly to the front and now occupies a prominent position in all lists. It is of handsome shape and color and largely grown for exhibiting at fairs, corn shows and is used by many corn schools as a standard for judging, and is too well known to require lengthy description. We have selected the choicest ear so that we are sure our seed cannot fail to please the most particular. It is of handsome yellow color, smooth, deep grained and the kernels are packed very closely on the cob, thus giving it an appearance of great solidity. Matures in about 115 days. Pk., 90c; bu., $3.00.

832. PAYMASTER.—The grains and cob are pure white; the grains are deep, broad and set very solid on the cob, which is medium size. A highly bred corn, containing a high percentage of protein. Maturing about medium, it is well filled at both butts and tip. Every stalk bears two well-developed ears. Pk., $1.25; bu., $4.00.

832-A. BLOODY BUTCHER.—Makes a large ear, and is a great yielder of both grain and fodder, and we believe one of the best drought-resisting corns. Makes in about 100 days. Prices: Peck, 10c; per bushel, $2.50.

FARMOGERM

A Seed Inoculant That Increases Crop Production

Seeds of all legumes—beans, peas, clover, alfalfa, and related crops—will yield far better if inoculated with Farmogerm, and in addition leave in the soil a heavy deposit of nitrogen which benefits all succeeding crops. Gardeners and farmers who have used Farmogerm would not be without it.

Farmogerm Stays Good Indefinitely and always has its full strength. Just add water and shake the bottle and sprinkle over the seeds as directed. Your crop will benefit beyond your expectations.

When ordering, be sure to state what crops you wish to inoculate. New scientific methods of manufacture have given lower prices. You cannot now afford to do without Farmogerm. A special composite culture is prepared for peas, beans and sweet peas—½-acre size only. You'll get more peas and beans, and larger sweet peas by using this. Ask for No. 5. Price 50c.

Farmogerm sizes are: 1-acre size, $1.00; 3-acre size, $2.50; 12-acre size, $9.00. Full directions accompany each bottle.
THE MEYERS PNEUMATIC COMPRESSED AIR SPRAYER
With Self-Locking D-Handle and Screw Top. With Adjustable Long Distance Spray Nozzle.

Fig. 1862 illustrates the Myers Pneumatic Sprayer as built to meet the demands for this style of Spray Pump. It is made of heavy galvanized iron with 1/4-inch brass tube cylinder attached to the can by means of a heavy brass screw nut. The small diameter cylinder operates easier than larger sizes. The nut is operated by lugs on the lower part of the handle, which engage in opening at the top of the nut. By means of these lugs and handle the nut can be screwed tightly to the top of the tank. When at the same time lock the plunger in opposition, which also permits of the tank being carried by the handle when desired. In the Myers construction we have done away with the large butterfly nuts as used on others, which are very objectionable features owing to the fact that it is not only difficult to screw the cap perfectly tight but also very injurious to the hands in pumping.

Price List. Represented by Fig. 1862
No. 296.—Myers Pneumatic Sprayer complete with long distance nozzle as shown in Fig. 1862. Price $6.00
Extra Nozzle as used on Fig. 1862, each $1.35

PIPE EXTENSION FOR COMPRESSED AIR SPRAYER
It is complete with screw cap and Fig. 550 Cyclone Nozzle. Attaches to regular nozzle, when in the regular nozzle becomes a Controlling Valve. Pipe Extension complete with nozzle. List $1.00

MYERS IMPROVED FAULTLESS SPRAYER
Made in Brass and Tin. Throws a spray as fine as mist. Kills, drives away and exterminates every living thing obnoxious to yourself, your animals or your crops. Is adapted for the destroying of insects, applying disinfectants to buildings, bushes, etc.; also for applying fly chasers to animals and applying light floor oils.

Will Spray Dry Powder.

Price List.
No. 1.—Improved Faultless Sprayer, all tin. Price $1.00 each, postpaid.
Notice.—Keep leather plunger well oiled. Always clean reservoir with clean water before putting away.
We carry all sizes of Myers sprayers. Write for catalog.

Moe's Chick Feed Trough
Just the thing for feeding growing chicks. The trough is made from one piece of metal with a gable-shaped top. This top prevents chicks from getting into trough and wasting and fouling feed. The top is easily removed for cleaning and the wide ends prevent upsetting. 60c postpaid.

FOUNTAIN AND FEEDER
A five-inch simple and practical fount which we can furnish at a very low price. You can feed either meal or mash in this feeder. Price, 15c each; 2 for 25c postpaid.

This is the best knapsack broadcast grain and seed sower made, and any person sowing any kind of grain or grass seed will more than save the cost of it on a very few acres besides sowing the seed much more even than they possibly can be by hand. Order one to come with your order and pay. Price, each $2.25 postpaid.

SAVE YOUR TREES
Tree Tanglefoot will effectually protect shade and fruit trees from most of our destructive insect pests. Particularly recommended against Canker Worms, Hara's Fall Moth, Canker Moth, Gypsy Moths, Climbing Cut Worms, Ants and Woolly Aphis. One application stays sticky three months.

For Tree Surgery.—Superior to anything on the market. It is the best application after pruning or trimming. It will waterproof crotch, cavity or wound when nothing else will.
Price 1-lb. cans, 50c; 2-lb. cans, 75c; 5-lb. cans, $2.25; 10-lb. cans, $4.25; 20-lb. cans, $8.00; 25-lb. wooden pails, $9.75. F. O. B. here.

Miscellaneous Supplies
Lee's Egg Maker and Chick Grower.
A Laying and Growing food for Poultry More Eggs at small cost.
2-lb. Pkg., 50 cts., postpaid.

Blackman's Medicated Salt Brick.
3-lb. Pkg., 50 cts., postpaid.

Dr. Harper's Ant-Cholera Tonic for Hogs.
One of the best known remedies to cure and prevent diseases in swine.
2-lb. Pkg., 75 cts., postpaid.

Egg-O-Latum.
A scientific preparation to preserve eggs for winter use. Put up eggs in summer while they are cheap and have fresh eggs in winter when they are high price.
Jar for 50 doz. eggs, 50 cts., postpaid.
We handle International Stock and Poultry Tonics. Write for Prices and Sizes.

Wizard Brand Sheep Manure
"A wagon load of manure in a bag." One of the best fertilizers for all purposes. Write for prices.

Celuloid Leg Bands.—Doz., 15c; 100, 85c postpaid

Queen Incubators.—Write for catalog. Mixed bird seed, Pkg., 25c, postpaid.

Bird manna, Pkg., 20c, postpaid.

Fish food, Pkg., 10c, postpaid.

Bird bitters, Pkg., 30c, postpaid.

Nestling food, Pkg., 30c, postpaid.

Bird cages, $3.50 up to $10.00.

We handle all supplies for Birds, Goldfish, Dogs, Cats, Poultry, Bees and Livestock. Let us know your wants.

Hanging baskets, 10-inch, 45c; 12-inch, 60c; 14-inch, 75c.

Flower pots, All sizes. Write for Prices.

Potted plants, Geraniums, Ferns, Hibiscus, Begonia, Coleus, etc. Write for Prices.

We carry a complete line of Insecticides, including lime sulphur solution, arsenic of lead, Bordeaux mixture and Paris green. We cannot ship any of these by mail, but we can send you an amount you wish to your nearest express office. Write for Prices.
Conkey's Remedies
Write for Conkey's 80-page Free Poultry Book.

Conkey's Roop Cure.—A positive cure for all forms of this disease. Placed in the drinking water. Price, 35c and 65c, postpaid.
Conkey's Limber-Neck Remedy.—A very effective cure. Price 65c, postpaid.
Conkey's Sealy Leg Remedy.—Guaranteed to cure. Price, 35c, postpaid.
Conkey's Poultry tonic.—Will keep fowls in the best of health, shortest the moulting period and increase the production of eggs. Price, 40c and 70c, postpaid.
Conkey's Lice Powder.—It will kill lice on chickens, horses and cattle, ticks on sheep, bugs on tomato plants, rose bushes, etc. Price, 20c and 40c, postpaid.
Conkey's Flea Salve.—Will positively rid fowls of "stick-tights." Price, 35c, postpaid.
Conkey's Head Lice Ointment.—Head lice annually kill thousands of little chickens—in fact, are the greatest cause of their loss. Price, 20c and 35c, postpaid.
Conkey's Cholera Cure.—A positive cure for bowel trouble, indigestion, diarrhea, dysentery, chojera, etc., in fowls. Tones up the system. Put in the drinking water. Price, 35c and 65c, postpaid.

Conkey's Chicken Pox Remedy.—Commonly known as Sore Head; guaranteed. Price, 35c and 70c, postpaid.
Conkey's White Diarrhoea Remedy.—Its action is to destroy the germs causing the trouble and to allay the feverish, ravaging condition present throughout the intestinal tract. Price, 35c and 65c, postpaid.
Conkey's Canker Special.—Don't have cankerblind birds in your flock. Price, 70c, postpaid.
Conkey's Nuxicide.—Disinfectant, Lice Liquid, Germ Destroyer. Germs are the cause of most diseases of poultry, horses, cattle, sheep, swine and other domestic animals. Price per pint, 50c, by express only at buyer's expense.
Conkey's Fly Knocker.—Prevents flies from annoying stock. Price per quart, 90c; one-half gallon, $1.25; gallon, $2.00. By express only at buyer's expense.

DON SUNG
A new discovery, makes hens lay, absolutely guaranteed to put your hens in good condition and make them lay more eggs. Price, box, 50c: parcel postpaid. Large size, box, $1.00; parcel postpaid. Special size, $5.20; parcel postpaid.

'BLACK LEAF 40’
Nicotine Sulphate—40 Per Cent Nicotine.
This is the insecticide that is so highly recommended by Experiment Stations. It destroys Aphids (plant lice), Thrips, Leafhoppers on all trees, bush and vine fruits, vegetables, field crops, flowers and shrubs; also Apple Red Bug, Pear Psylla and similar soft-bodied sucking insects—all without injury to foliage.
May be combined with other sprays. Highly concentrated. Soluble in water—easy to mix—does not clog nozzles.
You cannot go wrong by ordering "Black Leaf 40" for sucking insects.
1 ounce, 35c, makes 6 gallons spray.
One-half lb., $1.25, makes 40 to 120 gallons spray.
Two lbs., $3.75, makes 200 to 500 gallons spray.
10 lbs., $15.50, makes 800 to 2,500 gallons spray.
Cannot be sent by mail.

Moe's Round Baby Chick Feeder
A great feed and chick saver. Chicks can't get in and contaminate the feed or water, nor get drowned. 6-inch size, 8 holes, each...15c
8-inch size, 12 holes, each...25c

AVICOL
AVICOL STOPS CHICKS DYING.
A safe and effective remedy in tablet form for White Diarrhoea, Cholera, etc., in small and large grown fowls. Avicol is now being used by thousands of successful poultry raisers the world over. Write for circulars.
Price, trial box, 25c; large box, 50c; extra large box, $1.00; postage 2c extra.

THE EASY WAY
No Handling. No Mixing.
Compare the ordinary method of mixing wet sprays or filling loose dust devices with the new patented up-to-date improved Key Duster Simplicity and Cartridge Convenience. No longer need you neglect your garden, flowers or fruit because of such tiresome old-fashioned practice.

Beautiful Flowers and Shrubs.
By using specially prepared materials, approved by the Agricultural Experimental Stations, all in Handy Sealed Cartridges ready to apply instantly without waste.

All Handy Sealed Cartridges, 15c each.
For Vegetable and Small Fruit, B. A. Cartridge.
For Flowers and Shrubs, Office Cartridge.
For Fruit & Vegetables Nearly Ripe, Hellebore Cartridge.
For Aphids and Many Soft-Body Insects, Kaphia Cartridge.
For Orchard Fruit, L. A. S. Cartridge.

Key Duster Gun $1.50
A complete Garden Spray Calendar is supplied with every Gun.

FOR FLOWERS, FRUITS, VEGETABLES AND GARDENS
Flower Seeds

The beauty and fragrance of our garden flowers fill a place in our lives that nothing can replace. Some vines in that plants may be grown to make more sightly some fence or pile of stone or stump or building. Some plants can be grown in a partial shade where grass does not grow and others are serviceable in hanging baskets, vases, or veranda boxes. Some plants used for cuttings bring the sunshine to those that must live indoors, while others are useful for cemetery lots, a tribute to those that have gone before us. Borders, beds and masses of flowers may appeal to us most as "the bouquets that live." Most flowers are as easy to grow as vegetables. The same practices that promote the growth of grains, vegetables and fruit apply to flowers. Most seed should be covered 4 times its least diameter. Drained, moist, warm, mellow soil should be the flower's home, not soil that is wet or soil that will bake. The seeds we are offering are the best that we can procure, all thoroughly tested before we send them out.

PRICES ON FLOWER SEED ARE POSTPAID.

650. AGERATUM MEXICANUM.—A hardy annual which produces an abundance of light blue and lavender flowers throughout the summer. Flowers are very desirable for bouquets. Plants will also do well in pots kept in the fall before frosts. Height, 12 inches. Pkt., 10c.

651. ASTERS.—These universally grown and greatly admired flowers have undergone a great improvement in varieties of late years. Our mixtures contain a number of the best strains and furnish a choice selection of cut flowers in many shades of color. Sow indoors or under glass and at different times for a succession of bloom. Pkt., 10c.

652. ANTHRINUM, or SNAP DRAGON.—One of the most desirable flowers for general garden culture. They come in great quantity of colors and are as equally good for bouquets or for mass planting. They are biennials but can be handled as annuals also when sown early inside. They bloom in July and then until frost if covered up slightly. They go through the winter and bloom abundantly the second year for extra bloom. Start in the house and transplant outdoors when weather is favorable. Pkt., 10c.

653. BACHELOR'S BUTTON (Ragged Robin).—One of the most popular and desirable of old-fashioned garden annuals. Good for bouquets when mixed with other flowers. The plants reseed. Pkt., 10c.

654. BALSAM.—Commonly called Ladies' Slipper and Touch-Me-Not, forming neat symmetrical tree-like plant and a profusion of double and semi-double wax-like flowers in the most brilliant colors. Of easy culture, but don't plant the seed until the ground gets warm, as they are rather tender. Best mixed colors. Pkt., 10c.

655. CANDY TUFT (Giant Hyacinth).—One of the most useful and popular annuals. Completely covered with clusters of flowers that are esteemed for bouquets; also grown as border plants. The flowers are large, have bold spikes and are pure white. Pkt., 10c.

656. CARNATION (Marguerite Mixed).—These lovely fragrant carnations produce fine double flowers from seed sown in the garden early in the spring. The plants begin to bloom in about four months. When well started, the young plants should be transplanted to stand 12 inches apart. They are quite hardy, flowering the first season until late in the fall, and can be potted for winter blooming. Mixed colors. Pkt., 10c.

657. CHRYSANTHEMUM (Mixed).—These are not the large varieties grown and handled by florists. The annual varieties we offer are of many beautiful colors and similar to large daisies. If the shoots are nipped off when the plants are young they become more bushy. For early bloom start indoors, or sow where plants are to bloom. Pkt., 10c.

658. CLEMATIS.—Well-known and very popular perennial climbers. Usually grown from roots but can also be started from seed. They will climb on any support and are excellent for porches. Pkt., 10c.

659. COLEUS.—Without question the most popular and most admired of foliage plants. It is a tender perennial having variegated and beautifully marked foliage. Unsold for borders, ribbon beds, etc. A rapid grower and of easy culture. Pkt., 25c.

$1 FLOWER SEED ASSORTMENT—Postpaid

A complete assortment of the finest varieties—enough for a good sized flower garden and at just one-half regular prices. A real bargain to be sure.

Value: $1.00
FLOWER SEED—Con.

660. CYPRESS VINE (Ipomoea Quamoclit).—The dainty, graceful and feathery foliage makes this one of the most beautiful of climbers. It is especially desirable for a light screen in front of the porch. It bears an abundance of small scarlet and white flowers which contrast beautifully with the green leaves. Tender annual, growing to a height of 12 feet. Pkt., 10c.

661. CYCLAMEN.—A charming house plant with beautiful foliage and richly colored, fragrant flowers. A tender perennial, one foot high. Pkt., 25c.

662. COCKSCOMB.—Very showy yellow and crimson annuals. Extra large velvety flower heads on compact, very easy culture. Cut when partially open and hang in a dark closet to dry for winter decorations. Pkt., 10c.

663. COSMOS (Mixed).—When many of the garden flowers bloom, the Cosmos starts in. Tall, graceful, bushy; with feathery foliage. Plants producing a great variety of daisy-like flowers in many colors. Sow out doors after danger of frost is past. Pkt., 5c.

664. DIANTHUS, or PINKS.—An old-time garden favorite and a magnificent flower about 12 inches high, producing an abundance of brilliant colored blossoms. They are used in pots or borders. The seed may be sown out doors when the danger of frost is over, and they will produce flowers in profusion during the summer and up well in the autumn. Pkt., 10c.

665. FOXGLOVE (Digitalis).—Another old garden favorite. A stately, ornamental plant especially adapted for perennial borders and for planting among shrubbery. Flowers are of all colors, are bell or thimble-shaped, and borne in tall spikes. New plants may be obtained by dividing the roots. Will do well in half-shady places. Height, 3 to 5 feet. Hardy perennial. Pkt., 10c.

666. FORGET-ME-NOT (Myosotis Alpestris).—Few spring flowers are more universally admired than the pretty little Forget-Me-Not. Are used principally for bedding and mass plantings. Seed may be sown any time from early spring until midsummer. It is perennial but should be given a slight protection during the winter. Pkt., 10c.

667. GERANIUM.—We know of no plant that is better known or more universally admired than the Geranium. Commonly propagated by cuttings but may also be grown from seed which is very interesting. Pkt., 10c.

668. PANICULATA, pure white. Pkt., 10c.

669. ELEAGANS, delicate pink. Pkt., 10c.

670. HELIOTROPE (Mixed).—An old-fashioned favorite plant noted for the intense fragrance of the violet-colored flowers. If sown early indoors or in hotbeds, large, stocky plants can be produced which will bloom all season outdoors. Easy to grow from seed. Heliotropes are good pot plants for the house during winter. Pkt., 10c.

671. HOLLYHOCKS.—A favorite with everyone. Tall and stately and always handsome. Most beautiful when seen in groups or long rows with a backbone of evergreens or shrubbery. Pkt., 10c.

672. ICE PLANT (Mesembryanthemum Crystallinum).—A fine plant for sunny borders and also for dry, sunny situations on banks, rock work, old walls, etc. The foliage is very beautiful, being covered with ice-like globules. Useful for garnishing. Tender annual growing about 6 inches high. Pkt., 10c.

673. LARKSPUR, DWARF BEDDING.—These lovely annuals are quite hardy. The blooms are exceedingly handsome and most suitable for beds. Height, 1 foot. Pkt., 5c.

674. MARIGOLD.—One of those appreciated "sure-to-grow-and-bloom" garden flowers. Sow in spring where plants are to stand or in boxes and transplant. Grows about 2 feet tall and thrives best in a sandy loam. Pkt., 5c.

675. MIGNONETTE (Reseda Odorata).—An unequaled flower with a very delicate odor making a splendid addition to any bouquet. If seed is sown in April and again in July flowers may be had all summer and fall. Can also be grown in pots for winter flowering. Pkt., 10c.

(Flower Seed Continued on next page.)

STIM-U-plant

An All-the-Year Fertilizer for Garden and House Plants.

Growers of fine flowers, shrubs and vegetables for the best markets and for exhibition, fertilize and stimulate them frequently, a little at a time. An excellent way to utilize this purpose is Stim-U-plant, an odorless, highly concentrated plant food, in tablet form, with guaranteed chemical analysis of 11 per cent nitrogen, 12 per cent phosphoric acid, 15 per cent potash. The proportions are accurate, there is no unnecessary filler (and in this form you are able to apply plant-food exactly when and where as needed).

Make Your Garden a Wonder Garden.

These tablets increase production, heighten color and improve quality. Many professional and amateur growers use them extensively all the year round—from early spring until late fall outdoors, during the winter for pot plants, hothouse benches, etc. They are equally good for evergreens and other trees as for a small fern, petunia or other dotted plant.

Stim-U-plant Tablets

can be used in tablet form, or dissolved in water at the rate of one tablet to the quart. Complete directions with every package.

Order Stim-U-plant Tablets and your seed and plant order. Price, 10 tablets for $1; 25c for 50c; 75c for 1.00; $2.00.

Your Arkansas Seed and Nursery Company, Fayetteville, Arkansas
FLOWER SEED—Continued

676. MOON FLOWER.—Immensely pure white moon-like flowers, 5 to 6 inches across. Opens in the evening. A great climber for porches, etc. Pkt., 5c.

677. MORNING GLORY.—Too well known to need description. unsurpassed for covering fences, arbors, porches, etc. Splendid mixture. Pkt., 5c; oz., 20c.

Nasturtiums

678. GIANT FLOWERING DWARF MIXED.—These grand new bedding Nasturtiums are brilliant in the extreme. They produce in wonderful abundance large flowers of the most gorgeous hues. The colors are very intense, making a sharp diversity of color not to be found in common mixtures. The plants are strong and vigorous, growing very quickly and producing erect, symmetrical bushes, with foliage from light green to deep blue-green. Pkt., 5c; oz., 15c; ½ lb., 40c.

679. TALL GIANT FLOWERING MIXED.—A wonderful diversity of rich colors and new and striking combinations are found in this unequalled mixture. A row in full bloom is truly gorgeous beyond description, containing as it does every shade and tint of yellow, rose, scarlet, carmine, orange, lemon, bronze, violet, purple, maroon, ruby, cream and pink, both in solid colors and motled and striped in many showy and exquisite ways. Pkt., 5c; oz., 15c; ¼ lb., 40c.

680. PANSY—Mixed.—Pansies are familiar to most everyone and few are planting a garden without pansies. During recent years there has been a great improvement in size and color of flowers and in length and strength of flower stems. Pkt., 10c.

681. PETUNIA (Mixed).—For vases, urns and window boxes there is hardly a plant that can compare with petunias. Continue blooming in a multitude of colors and of drooping habit. It is one of the most effective of flowering plants, far superior for these purposes than geraniums. Single and double flowers. Best started in boxes or under glass. Variety of mounding or rich soil. Pkt., 10c.

682. PHLOX DRUMMONDII.—The showiest and the most easily raised of all annuals. We know of no flower which produces such a continuous supply of the most attractive blooms in a most wonderful range of colors. All the tints of the rainbow are represented with all possible variations of stripes, veins and eyes of contrasting shades. Seed should be sown in the ground as soon as danger of frost is over and in a few weeks the beds are a blaze of glory. Pkt., 10c.

683. ALBA.—Have beautiful round petaled pure white flowers which overlap each other. Pkt., 10c.

684. COCCINEA.—Same variety as Alba only deep red or fiery scarlet. Pkt., 10c.

685. MIXED PHLOX.—All varieties and colors in a splendid mixture. Pkt., 6c.

686. POPPY (Mixed).—These wonderful plants win their multitude of colors put life into the garden before most any other plants have started. Against a background of green foliage, there are hardly any plants presenting such an intense array of veritable beds of colors. The plants should be sown very early and only in sunny exposure. So several times for succession. Pkt., 5c.

687. PORTULACA (Rose Moss).—A charming bedding annual. About 6 inches high, flowers appear in a short time from seed and throughout the entire summer they produce a perfect carpet of brilliant color. Thrives on any kind of soil and will grow in beds; also used for edging and in rock work. Once established it withstands dry weather and heat to a remarkable degree. The beautiful colors make a dazzling display. Pkt., 10c.

688. SALVIA SPLENDENS (Scarlet Sage).—A standard bedding plant that keeps the garden bright with color until late in autumn. This plant lends itself to many uses. It makes a good pot plant, does well in window boxes and is useful for cutting to give color. Its best use, however, is as a hedge or border plant. Where long, broad bands of intense color are desirable the seed should be sowed in beds and when planted outdoors should be cold-framed, same as cucumber or tomato. Pkt., 10c.

689. SHASTA DAISY.—The plant grows fast and increases rapidly. It is a fine bloomer. The flowers measure 2 to 3 inches across and are borne on long stems. They have two rows of long, broad white petals and a yellow center. Pkt., 10c.

690. SWEET ALYSSUM (Little Gem).—Dwarf, neat, compact habit; blooms from early spring until frost. Excellent for bordering beds or walls; also desirable for hanging baskets or vases. Flowers white, fragrant, completely covering the plant. Pkt., 5c; oz., 25c.
Sweet Peas

Culture.—Early in the spring make a trench 3 or 4 inches deep in rich mellow soil, so arranged that no water can stand in it and plant in the bottom covering at first only 1 inch deep. When the plants are 2 inches high cultivate and as they gradually grow fill in the trench. When the plants are about 1 inch high support should be furnished for the vines to run on. The roots should not be allowed to become too dry. Water applied thoroughly once or twice a week, early in the morning or in the evening, is better than light sprinkling. Nothing can give more beauty and enchantment to a garden than sweet peas, with their most beautiful colors. The seed we offer are of the pure Spencer type.

691. KING WHITE SPENCER.—The best white Spencer. The flowers produced generally four on a stem are of extremely large size, of fine substance and well placed on thick long stems. The standard is distinctly frilled and waved and the large waved wings gracefully cover the keel. The vines are strong and vigorous. Pkt., 10c; ½ oz., 20c; oz., 50c.

697. SWEET WILLIAM (Mixed).—Fine border plant and excellent for cutting. They are hardy, free-flowing and have a splendid bloom for several weeks. The plants have all varieties of colors ranging from the light to the darker shades. Sow outdoors early in the spring and three to six inches in the row. Seed can be sown in the fall. Pkt., 10c.

698. VERBENA.—A popular annual of low spreading growth. It produces large clusters of showy flowers about 2 or 3 inches across which are of wide range of colors. Shades and stripes usually running from pure white to deep purple. Sow seed in early spring in boxes or in open ground after danger from frost is past. Verbenas grown from seed are more vigorous and healthy than when grown from cuttings. Pkt., 10c.

699. VINCA (Periwinkle or Old Maid).—A free-blooming, tender, perennial bedding plant. It has glossy, green leaves and pretty red and white flowers. They flower from seed the first season and if taken into the house before frost they will bloom all winter. A fine cut-flower as the buds open readily in water. Pkt., 10c.

700. ZINNIA (Giant Flowered Mixed).—An improved strain of the old-fashioned Zinnia producing double flowers of great size. The plants grow about 15 inches high and the double flowers are produced in great abundance on short stems. They produce flowers all summer and late into the fall. Splendid effect can be produced in beds and borders. With these magnificent flowers we offer a mixture of well-balanced colors: White, red, pink and yellow. Pkt., 10c.

Flowery Bulbs

701. HYACINTH—1st size, named varieties, 15c each; $1.50 dozen.

702. HYACINTH—2nd size, named varieties. 10c each; $1.00 dozen.
